Senator Orlando Harrison and Mr. George A. Harrison Planted
The Large Commercial Orchards of Superior Strains
From Which We Select Our Fruit Tree Buds

WE MERIT YOUR PATRONAGE

BECAUSE: We enjoy the confidence of a large and steadily increasing trade, which has been built up by us by many years of faithful service and strict adherence to the golden rule, "Do unto others as you would have others do unto you."

BECAUSE: Our prices are consistent with the quality of the stock we sell. We claim and can prove that our trees are bigger at any age than nearly all others; that they are as hardy as the hardiest and hardier than most others; that they have well-ripened, firm wood when we sell them; that they are absolutely clean and free from disease, true to name, and that they are budded from bearing orchards of superior strains.

BECAUSE: WE SELL ONLY TREES WE GROW. Every tree you buy from us is Harrison-grown, and is so guaranteed. We will not expose our customers to possibility of error in variety, or lack of quality in the trees, and under no circumstances will we sell or offer for sale any trees not grown on our land under our own direction.

BECAUSE: Behind our stock, as a guarantee of its superior quality, is the ripe experience of more than forty-six years in nursery and orchard work. The third generation, consisting

of six Harrison Brothers, are devoting their entire time and attention to the production of "Harrison Quality" trees for you to plant. The statements in this catalog are based on our experience—they are true, and you can depend on them.

HARRISONS' FRUIT TREES ARE TRUE TO NAME

Harrisons' Nurseries have been budding direct from bearing commercial orchards, selecting only from those trees which for many years have shown to have unusually heavy-bearing habits, consisting of the best types possible and of the best known strains, for more than forty years.

This is an old Harrison-process, which has been the backbone of our wonderful international success in selling trees, and the idea was originated by our late Senator Orlando Harrison and our late George A. Harrison.

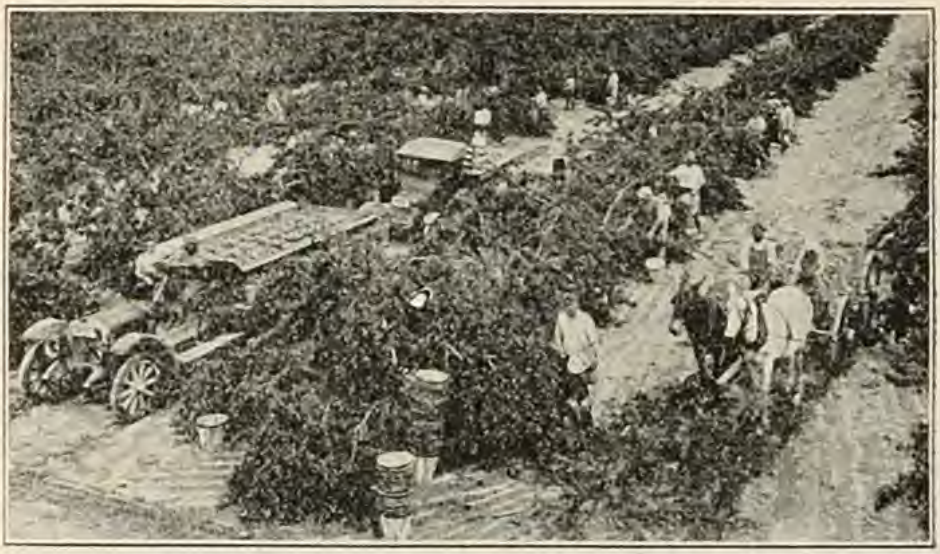
This process has just recently been discovered by some nurseries. Harrisons' reputation on fruit trees has been built up by the fact that over a quarter of a million customers have found by actual test of growing and fruiting our trees that they have proven to be absolutely true to name, the best strains for the respective varieties, hardy, sturdy, vigorous, withstanding the rigid cold winters of Canada, as well as the hot, scorching summers of Georgia, Florida, Texas and Mexico.

Budded Apple Tree Bearing at Two Years

HARRISONS' FRUIT TREES ARE BUDDED

Leading orchardists prefer budded trees, as it is generally conceded that they are sturdier, quicker growers and far superior to grafted, hence the reason why all Harrisons' fruit trees are budded.

It has been pretty thoroughly demonstrated that when young trees are propagated by buds, they have the same bearing characteristics as the trees from which the budding wood was cut. If this tree is a regular bearer of heavy crops of fine fruit, the young trees will be the same. If that tree is a shy bearer, or produces inferior fruit, the young trees



Picking Peaches in One of Our Several Elberta Orchards

have very little chance of ever becoming profitable orchards. You can notice it in your own orchard and neighborhood—one Baldwin or York Imperial tree will bear twice as many as another standing alongside of it, and better apples, too. This condition applies as well to peaches, pears, plums, cherries and other fruits.

When, therefore, we say that our trees are budded from bearing orchards, it means that they have come from trees growing in a successful orchard, and that they should possess superior bearing habits throughout their life. Harrisons' apple, pear and cherry trees are budded on French Grown Whole Root Seedlings, producing the cleanest, largest and best roots available and insuring long-lived trees. When you order Harrisons' trees henceforth, know that you are getting stock that has been propagated in our own nurseries, from buds cut from selected bearing trees, budded on well-grown whole root seedlings, and cared for in the best manner while growing in our nurseries. Harrisons' trees are dependable at all times.

No matter where you buy trees, or what price you pay, they are a distinct loss unless they make good in your orchard. It's mighty unfortunate that many people forget this fact, and innocently buy trees because they think they are saving a few cents.

We claim, and can prove, that the trees from our nurseries are larger than most other trees; tests of more than forty-six years show that they are as hardy and adaptable as trees grown in any part of the country, and nine times in ten they are hardier; the wood is well ripened, firm and solid when the trees are offered for sale; and it goes without saying that they are clean and free from disease.

There are a good many things that put Harrison-grown trees in the front rank, but probably the most important is the fact that our trees are budded from bearing orchards. That means pedigreed trees, although we don't give them that title.

The bud-sticks we use are cut from trees that are known to be large producers for several years—not first-year bearers. We want to know that the parent tree is worthy of having its characteristics transmitted to a second or third generation.

OUR TREES ARE FREE FROM DISEASE AND INSECTS

All stock is thoroughly inspected by the Maryland State Entomologist and his corps each fall and spring just before digging time, and one of his assistants, in the employ of the State, is located at our nursery during the entire shipping season. The trees are given a final thorough inspection just before they are packed ready for shipment. Every precaution possible is taken for the protection of the customer and his stock, and each carload, box or bale is tagged with the State Entomologist's Certificate of Health Inspection.

HARRISON-GROWN PEACH TREES

BUDS CUT FROM BEARING commercial orchards of superior strains. Harrison peach trees are favorably known in every state in the Union. Many of the largest and finest peach orchards in America are planted with Harrison-grown trees. We have been growing peach trees for forty-six years.

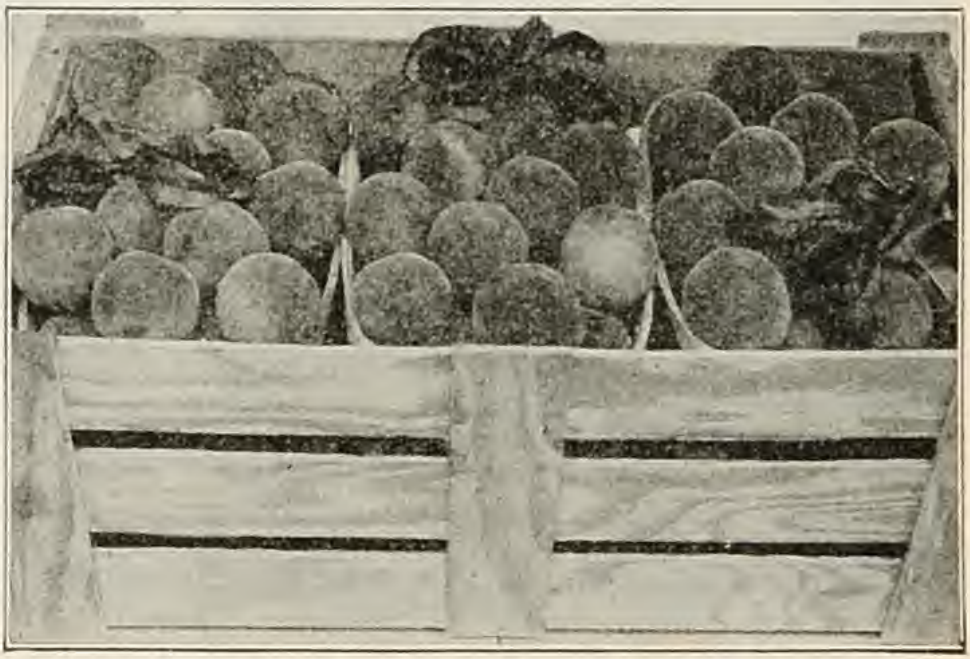
List of Peach Varieties

Alexander—Very early, white, medium to large, greenish white, with deep red flesh. Vigorous and productive.

Beer Smock—Late, yellow, freestone, large, oval, skin orange yellow mottled with red, high flavor.

BELLE OF GEORGIA (BELLE)—Mid-season, white, freestone, large size, and most attractive in color and shape, with a light red cheek; flesh white, firm and delicious; extra

fine flavor and generally considered as the highest flavored peach grown. Tree grows quickly and shapely, are hardy and bear bumper crops annually, one of the heaviest consistent commercial bearers. One of the best long-distance shippers. Its highly attractive coloring with large size and wonderful carrying qualities and unusual pleasing flavor have won Belle of Georgia the national reputation of being the best white peach. Packs well in the standard six-gallon carriers, also bushels and half bushels. Always brings the highest market prices during its season. Our Belle of Georgia are propagated from the original strain; the buds being selected and sent us by a relative of the late Mr. L. A. Rumph of Marshallville, Georgia, being the originator of this famous variety.

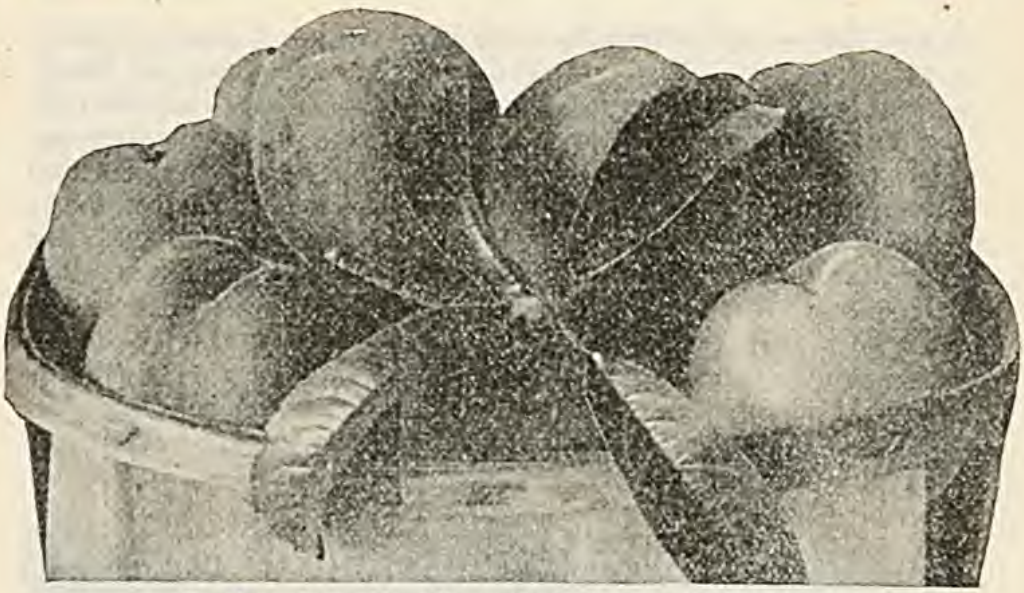


The Kind of Fruit Our Belle of Georgia Produces

Berks Favorite—Late, white, freestone, new variety.

Bernard—Mid-season, yellow, freestone, juicy, rich, very productive.

BRACKETT—Medium late, ripens about a week later than Elberta, and fruit similar to Elberta, but of better flavor. Yellow, freestone, large size and highly flavored. The best commercial or family peach to plant so as to extend the period of ripening in which the Elberta is so popular. Brackett is a good shipper and brings the highest prices, always selling at the same high prices with Elberta and often from 25 cents to 50 cents per carrier or bushel higher, especially on the New York City and Boston markets. Brackett will grow in any section where Elberta will thrive. You will never regret planting Brackett in your commercial or home orchard.



Brackett Is a New Recognized Commercial Variety

Captain Ede—Mid-season, yellow, freestone, large.

Cumberland—Early, white, semi-freestone, new variety.

CARMAN—Early, white, semi-freestone, medium size, being a remarkably attractive and luscious peach, oval shaped, yellowish white with bright red cheek; flesh creamy white, spicy and good flavor. Tree is very hardy, strong grower and the heaviest producer of the early varieties, also a sure cropper. Carman stands shipping so well that it reaches the market in prime condition and with its handsome appearance causes it to bring satisfactory prices.

CHAMPION—Early, mid-season. White, freestone, very large, creamy white with red cheek, sweet, juicy; very high flavor, good shipper when properly grown; its fault, if anything, is that it is too tender. Reason why Champion has lost its past commercial importance is that it will not carry satisfactorily under refrigeration in cars for four to seven days, but as a home garden or a roadside peach, it is one of the best. Tree is hardy, large grower and productive.

Crawford's Early—Mid-season, yellow, freestone, large size, juicy, sweet flavored, highly prized for canning. Tree strong grower and prolific bearer. One of the old time commercial varieties, which has been extensively planted in years past but now mainly a home market fruit.

CRAWFORD LATE—Late, yellow, freestone, superb in size and shape; splendid yellow, with broad dark red cheek; flesh deep yellow, juicy and melting, rich, winy flavor. One of the best late sorts. Tree vigorous, hardy and sure bearing, coming at a time when the mid-season peaches are over, this variety is eagerly bought up for canning and preserving, and brings highest prices. Being such a remarkably good shipper, it reaches the market in first class condition. An old commercial favorite.

ELBERTA

THE WORLD'S GREATEST AND BEST MONEY-MAKING PEACH

Mid-season, yellow, freestone. Fruit is large to extra large; golden yellow, with brilliant shades of red; firm, juicy, rich, sweet and good flavor. Elberta has the greatest international reputation of any peach. It has been the standard for all other peaches almost since the date of its introduction. The coloring of Elberta is practically perfect. The rich, yellow skin is almost entirely covered with dark red blush upon the sunny side. This attractive appearance and the uniform large size serve to sell it almost on sight.

Harrisons' Original Strain of Elberta Always Bears Bumper Crops

The Best Commercial Variety

Tree is vigorous, very hardy, sturdy, thrives in widely different localities. Elberta is hardier in bud than most varieties, and is a uniform prolific bearer. You can always depend on Elberta for a sure cropper.

Elberta Is the Best Long-Distance Shipper

The large fruit, being uniform in size and shape, along with its high attractive red color and firmness, also its ability to stand shipments of three thousand or more miles under refrigeration in cars for two to three weeks before being consumed, but with stamina enough to still look its best, has won Elberta the reputation of being a peach without a peer and the variety which is always in favor and strong demand with the buying public, therefore demanding the highest possible market prices. Elberta is by far the best canning peach.

Harrisons' 30-year-old Elberta commercial orchard is the oldest in America. America's oldest commercial peach orchard of approximately two thousand trees produced a large crop of United States number one grade Elbertas last August, and this orchard has never missed a heavy crop. Several thousand of our customers in every peach-growing section of the Union tell us that we have by far the finest, the best, the most uniform and most profitable strain of Elbertas in America. The buds from which our 30-year-old Elberta orchard was propagated were cut in person by our late Senator Orlando Harrison while visiting the late Samuel H. Rumph of Marshallville, Georgia, the originator of Elberta, from the original, and brought in person by the Senator and budded in our nurseries.

There are many different types of Elberta, and the "Best Strain" is the cheapest and most profitable in the long-time investment.

Recommend planting fifty to seventy-five per cent of your commercial orchard to Elberta.

Plant Harrisons' Superior Strain of Elberta and reap the huge gold profits.

Early Elberta—Early mid-season, ripens about a week to ten days earlier than Elberta, yellow, freestone, large, somewhat similar to Elberta, but a trifle better flavor. Its earliness is its most attractive feature and is being planted more or less in commercial orchards. Excellent home orchard peach.

EARLY ROSE—Very early, white, cling, small to medium size, red blush, sweet flavor. Tree being an average grower, but a very prolific bearer. Georgia growers made astounding huge profits from Early Rose during 1929, being packed mostly in round half-bushel baskets and six-gallon carriers, consequently this variety is being heavily planted in Georgia.

Eclipse—Early, yellow, freestone, new variety.

Engle's Mammoth (Engle)—Late, yellow, freestone, large, resembles Crawford Late.

Fitzgerald—Late, yellow, freestone, large, good.

Fox Seedling (Fox)—Late, white, freestone, large; white with whole side red, melting sweet, high quality and high flavor. Good for roadside market and canning.

Frances—Late, yellow, freestone, medium to large size; good quality.

Greensboro—Medium early, white, freestone, extra large for such an early peach, and one of the handsomest, being a rich, yellowish white, with crimson cheek, flesh is white, exceedingly tender and of fine quality. Being somewhat tender, it requires extra care and quick shipments, preferable for nearby markets.

Gold Drop—Late, yellow, freestone, medium size, fine flavor, heavy bearer, very hardy. Generally planted in Michigan.

Hiley—The Famous Southern Peach

HILEY (HILEY BELLE)—Early, white freestone, medium size, highly red colored, very firm, being an exceedingly handsome creamy white peach with a delightful red cheek; flesh is white, fine texture, aromatic, very juicy and of the highest flavor. Tree is strong grower, very healthy and a marvelous heavy bearer. Being an excellent shipper, with the stamina to withstand very long hauls under refrigeration, together with its beautiful, most appetizing appearance, and being easily attractively packed in six-gallon carriers, bushels and half-bushels, along with its recent high reputation and favor with the buying public, has made Hiley a strong contender as the highest general averaged priced peach. One of our customers who bought several thousand Hiley trees from us a few years ago picked from this orchard during 1929 over 80 cars of Hiley peaches, being properly sprayed, thoroughly cultivated and with ample fertilizer, this insuring only high quality, machine graded, packed ring-faced in round half-bushel baskets, United States Number One grade, Government Inspected, were shipped during early summer of 1929, and the general average on all cars of Hiley being more than $1,100 net cash per refrigerator car f.o.b. Fort Valley, Georgia. This same customer, who made the largest profit in his entire peach career, bought approximately 15,000 peach trees from us again in December, 1929, consisting of a large percentage of Hiley. Many of our varieties are propagated direct from the original strain, and Hiley being no exception, as our late Mr. George A. Harrison cut the buds from the orchard of Mr. Eugene Hiley of Marshallville, Georgia, the originator of Hiley, then known as Early Belle, and later as Hiley Early Belle, now known as Hiley. Our Messrs. Harrison have frequently visited Georgia and also cut buds from trees being propagated direct from the original strain of Hiley from the famous Hiley orchards of Rumph Brothers of Marshallville, Georgia. Add Harrisons' Strain of Hiley to your commercial plantings for real profit.

J. H. HALE (HALE)—Mid-season, yellow, freestone, extra large, round, beautiful red coloring, firm, and of the highest quality and enticing flavor. Ripens about two or three days prior to Elberta. Hales are too large to properly pack in six-gallon carriers, but they make the most attractive and commanding appearance when packed ring-faced in bushel and half-bushel baskets. Hale quickly made a National reputation and is a strong competitor of Elberta, being just about as good a shipper as Elberta on long hauls. Prices on Hale and Elberta, with a large national crop, are about the same, but on a short crop year Hales usually sell from 25c to 50c, and sometimes 75c more per bushel on the largest wholesale markets.

Our Hales are propagated direct from the original strain, the buds being selected and cut by our late Senator Orlando Harrison and his son, Mr. G. Hale Harrison, in person, with the late Honorable J. H. Hale of South Glastonbury, Conn., the originator of the J. H. Hale, who at that time was the "Peach King of America," owning large commercial orchards at South Glastonbury, Conn., and Fort Valley, Ga.

Tree is somewhat dwarf, a moderate grower, and should be planted on the richest, best, well drained peach soil available. Hale needs more cultivation and fertilization than most varieties. To aid large crops, suggest planting Belle of Georgia or Hiley or Elberta along with J. H. Hale to insure the proper cross-pollenization.

Plant Harrisons' Strain of Hale for Fancy Trade

Harrisons' Original Strain of J. H. Hale Peaches

Hill's Chili—Late, yellow, freestone, medium size, hardy.

Iron Mountain—Late, white, freestone, large. Generally planted in New Jersey.

Kalamazoo—Mid-season, yellow, freestone, golden yellow color with pink blush, fine quality. Popular in Michigan.

KRUMMELS (KRUMMELS' LATE OCTOBER)—Very late, yellow, freestone, extra large, round, deep yellow with a blush of carmine on the sunny side—fine flavor. Good shipper, and ripens so late in the season that it has no real competition on the market, generally bringing satisfactory prices. If you desire a real late peach, of good quality, then there is none better than Krummels.

Lemon Free—Medium late, yellow, freestone, large, lemon-shaped and lemon-colored with pink blush, excellent quality. Fine for canning.

Lemon Cling—Medium late, yellow, cling, large, lemon-shaped; deep yellow and brownish red, very good quality. Tree vigorous, highly productive, regular bearer.

MAMIE ROSS—Early, white, freestone, large, white covered with a beautiful delicate carmine-red blush; firm, juicy, good quality, excellent shipper, being the largest size early peach, ranging about a third larger in size than Carman. Popular on the markets where known, especially New York City, sells at a premium over any other variety ripening at the same time, generally at very satisfactory prices. Mamie Ross is being planted in preference to Carman, ripens two or three days later than Carman, but is far superior.

Matthews Beauty—Mid-season, yellow, freestone, good flavor.

Mayflower—Very early, white, cling, small size with red all over. Limited planting in Southern Georgia.

Muir—Mid-season, yellow, freestone, large, sweet, excellent for drying and canning. Popular in California.

Mountain Rose—Mid-season, white, freestone, large, round, white with much red in several shades, juicy, rich, tender, sweet. Old-time favorite.

New Prolific—Mid-season, yellow, freestone, large, productive.

Niagara—Mid-season, yellow, freestone, large with beautiful red cheek, making it one of the most attractive.

Old Mixon Free—Mid-season, white, freestone, large with bright red cheek, tender, rich, excellent flavor.

Phillips Cling—Late, yellow, cling, large, with bright red tinge, excellent flavor. Best late canning peach.

Primrose—Mid-season, yellow, freestone, new variety.

Radiance—Early, white, freestone, new variety.

RAY—Mid-season, white, freestone, large, most attractive red blush of delicate shade, juicy, delicious, tender and excellent flavor. Trees are exceedingly strong growers, shapely and symmetrical, a regular bearer of big crops and generally considered as the heaviest, most consistent cropper known. Plant Ray for nearby markets and roadside stands, as its fine, attractive appearance and high flavor sell it on sight.

Red Bird Cling (Early Wheeler)—Very early, white, cling, extra large with a bright red blush, poor flavor, but an excellent shipper. Beautiful peach.

ROCHESTER—Early, mid-season, yellow, freestone, large, covered with mottled red blush; flesh yellow stained with red at pit, very good quality, prolific bearer. One of the best early mid-season yellow freestone peaches for nearby markets, and highly desirable for canning. Our buds came direct from the original tree from Mr. A. H. Heberle of Rochester, New York, the originator. Popular in Western New York and Michigan.

Salberta—Late, yellow, freestone, large, being a satisfactory cross between Elberta and Salway. Salberta inherited the size, quality and productiveness of Elberta, and inherited the lateness in season of Salway, making a fine combination for a profitable late peach. This new variety is being planted commercially more or less in Ohio and Michigan.

Salway—Late, yellow, freestone, large, beautifully mottled with red and a brownish red cheek; the flesh is yellow, firm, rich, juicy and sugary, and particularly fine for canning and preserving. Generally grown in the Mountain districts, good shipper, desirable for the fancy trade.

SHIPPERS' LATE RED—Late, yellow, freestone, large, round, bulkier than Elberta, with an attractive red coloring which is catchy to the eye. Flesh is yellow, juicy, sweet and pleasing flavor. Trees are very hardy, good growers, bears young, sure cropper, and prolific bearer. Promising new late commercial variety and excellent home sort.

SLAPPEY—Early mid-season, yellow, freestone, medium to large size, beautifully red colored, rich, juicy and extra good flavor. Good commercial variety for nearby markets and one of the best early yellow freestone peaches.

SOUTH HAVEN—Early yellow, freestone, large, roundish, uniform size, deep yellow with a red cheek, delicious flavor. Ripens about fifteen to eighteen days ahead of Elberta. Tree very hardy, good grower and a consistent, heavy bearer. A most promising early yellow freestone peach for the commercial orchards. Suggest you planting South Haven in a limited way to compare with other standard varieties.

Triumph—Very early, yellow, semi-freestone, medium to large size, dark red coloring, excellent shipper. Generally planted in the colder sections of the North.

WHITE HEATH CLING (HEATH)—Late white, cling, sometimes called Mammoth Heath Cling, extra large, round, with red blush, flesh is firm, white, exceedingly juicy, and ripens fully to the pit. Favorite for canning and pickling. Be sure to include in your family orchard.

Wilma—Mid-season, yellow, freestone, large, good red color, somewhat similar to its parent, Elberta.

Yellow St. John—Early, yellow, freestone, medium size, one of the earliest of the Crawford types, handsome and delicious flavor. Tree is hardy, vigorous, heavy bearer. Generally grown in Michigan.

HARRISON-GROWN APPLE TREES

Harrison-grown apple trees are budded direct from bearing commercial orchards of superior strains on French-Grown Whole Root apple seedlings. Harrisons' trees will bear sooner and bear heavier than the average trees all of their lives. Our favorable soil and climate enables us to produce larger, smoother and better quality trees than can be grown in the average nursery sections.

List of Apple Varieties

Albemarle Pippin—See Yellow Newton for description.

American Golden Russet—Fall, sometimes called Sheep-Nose. Medium size, round; greenish russet or bronze.

Baldwin Apple

BALDWIN—Winter, large, round, bright red, crisp, juicy and rich; good late keeper, esteemed as an eating apple and for cooking. Quick and large grower; yields big crops. A wonderful shipper, standing long distances very successfully. The best northern apple for packing in barrels, fine

cold storage apple, strong demand for carload shipments of Baldwins to European and South American markets. Brings high prices on foreign markets; also popular on the New England and Northern States markets. Grows to perfection in New England, New York, Pennsylvania, Michigan and Canada, but should not be planted South of the Mason-Dixon line. Baldwin is the leading commercial variety in the Northern States.

Ben Davis—Winter, fine looking, large, round; yellow with red stripes; flesh white, juicy sub-acid, coarse. Good for cooking, but on account of poor flavor not desirable for fresh eating. Finest keeper known. Can be kept in cold storage until July. Excellent shipper, usually packed in barrels. Best known export apple, always in good demand by European, South American and Asiatic buyers; highest prices. Grow Ben Davis on a commercial scale for export trade. Tree is a rapid grower, healthy, vigorous, bears at an early age, heavy cropper and a sure bearer.

Benoni—Summer, orange yellow—lively red, productive.

CORTLAND—Fall, a promising new variety resulting from cross pollinization of McIntosh Red and Ben Davis, and inheriting the good qualities of each parent. Beautiful red apple, approximately the same size and fine flavor of the McIntosh, but ripens about three weeks or a month later. Good keeper. Our buds were cut direct from the bearing Cortland in a prominent orchard at Kinderhook, New York.

DUCHESS (Duchess of Oldenburg)—Summer. Medium size, red striped, flesh white, juicy and good flavor. Unusually heavy bearer, very dependable cropper. You can depend on the Duchess to yield apples you can sell for good prices. Trees are natural dwarf growers and make fine fillers; require small root and branch space. Very hardy, and can be successfully grown in the Southern States as well as the cold climates of Minnesota, Montana and Canada.

Early Harvest—Summer, very early, not a good keeper; fruit medium size pale yellow, tender, juicy, sub-acid. Fine for home orchard because of its merit as a cooking and dessert fruit. Tree is a vigorous grower and bears early and regularly.

Ensee—Winter, dull red, suggesting its Rome Beauty strain in size and shape; crisp, tender, yellow flesh and good flavor.

Early McIntosh—Summer, red, attractive, good size; flesh white, fine, tender, juicy and fine flavor, being similar to McIntosh Red. Tree vigorous, hardy, healthy and productive.

Fameuse (Snow)—Fall, medium size to large; deep red; flesh snowy white, fair flavor, sells for good prices on local markets, but not recommended for shipping. Most popular in Canada.

Harrisons' Superior Strain of Delicious Is a Bright Red Type —Almost 100% Attractive Red Color When Properly Grown

DELICIOUS—Late fall or early winter—of peculiar and distinctive shape; brilliant dark red, flesh fine grained, juicy, crisp and melting, flavor sweet, with a slight acid taste, with a delightful aroma, very highest quality. Excellent for eating, and the most popular fruit stand apple. Packs well in boxes and bushels, always bringing high prices on the leading markets, and in strong demand by the best trade. Being a good shipper, along with its high red color and fine flavor, has placed the Delicious among the topnotchers. Tree is hardy, vigorous grower and a good, dependable cropper when properly pollinized. Suggest planting Grimes Golden and Jonathan as pollinizers with Delicious.

GANO (BLACK BEN)—Winter, a handsome, large apple of perfect shape, with a smooth, glossy, brilliant deep red skin; flesh is white, slightly tinged with yellow, firm, rather coarse, crisp, mild sub-acid, fair flavor. Gano is one of the most popular export apples, being bought by South American trade at a premium in prices to others. Excellent keeper, standing long shipments as well as any other variety, usually packed in barrels. Tree is a strong, vigorous grower, with somewhat drooping branches, and comes into bearing young, producing regular and abundant crops. A sure money-maker for the export trade.

Gravenstein—Fall, extra large, perfect in form and handsome in coloring—orange-yellow overlaid with broken stripes of light and dark red; flesh is yellowish, firm, crisp, tender, juicy, fine flavor. Good for cooking, extra vigorous tree, comes into bearing rather early and bears profuse crops regularly. Grown most extensively in California and commands good prices.

GRIMES GOLDEN (Grimes)—Fall, medium sized, golden yellow, tender, rich, aromatic, sub-acid, delicious, possibly the best flavored apple known, and a good keeper. No better variety exists for eating raw or for cooking. Tree is very hardy and one of the heaviest bearers known, producing extra large crops annually. Excellent variety for a filler, as it comes into bearing very early. Grimes Golden is the best pollinizer known, especially for Stayman Winesap, Delicious, Paragon or Mammoth Black Twig, Winesap, McIntosh and others. Be sure to include Grimes Golden in your orchard. When all factors are considered, Grimes Golden is the best, highest flavored, longest keeper and most profitable yellow apple grown. Numerous experiments and observations on the study of cross-pollinization were conducted by Dr. E. C. Auchter, horticulturist, University of Maryland, now with the U. S. Department of Agriculture, in our several large bearing commercial apple orchards at Berlin.

Hubbardston (Hubbardston None-Such)—Winter, large, red striped, strong grower, bears well every year.

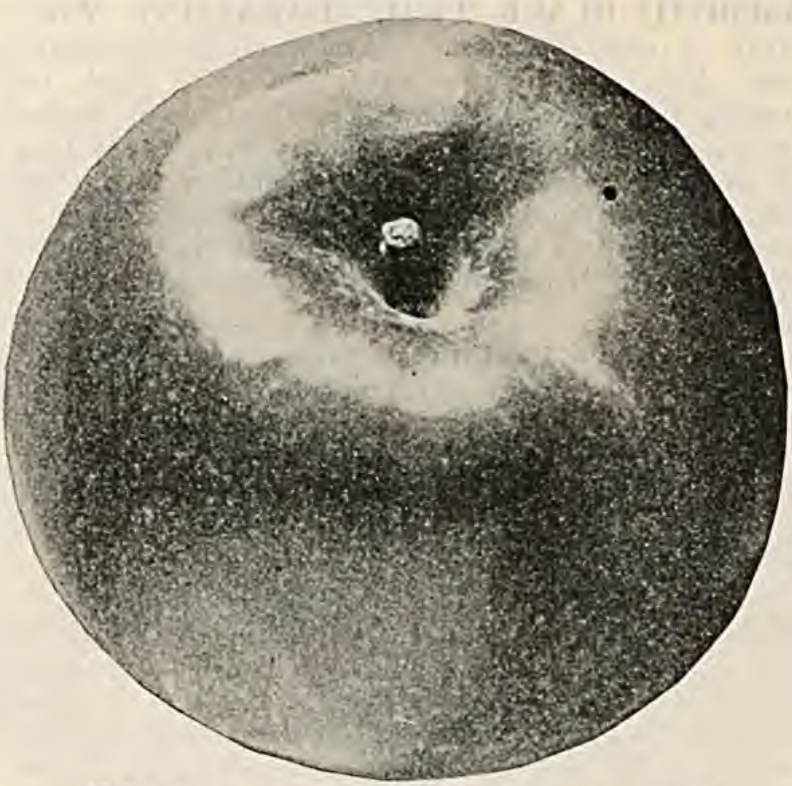
JONATHAN—Early winter, medium to large; brilliant red, juicy, fine grained, tender, mild, sub-acid, and very highly flavored. Late keeper and an excellent shipper. Tree long lived, but comes into bearing very young and produces big crops every year. Popular bushel and box variety, demanding highest prices on account of its attractive red appearance and fine flavor. Fine variety for a pollinizer.

King (King of Tompkins County)—Fall, extra large, very red, with a tint of yellow, flesh yellow, crisp, juicy, sub-acid, good quality. Tree slow grower and not a big producer. Generally planted in New York.

King David—Fall, a beautiful deep dark red apple, resembling Jonathan as to size and shape, but not quite as good flavor. Splendid shipper and keeper. Tree hardy, and comes into bearing young.

Liveland Raspberry—Summer, large, waxy white, marbled with crimson, flesh white stained with red, tender, poor quality. Tree vigorous, early bearer.

Lowry—Winter, beautiful mahogany red, good, medium size, round oval shape, nearly sweet, mild sub-acid; excellent flavor, good shipper, long keeper, and sells at fancy prices in export as well as domestic markets. New popular commercial variety in Virginia.



McIntosh Red Is a Very High-Priced Apple, and Leads All Others in Flavor

McINTOSH RED—Fall, but an early winter variety in New York, Michigan and New England States. An exceedingly valuable, hardy, attractive apple; medium large size; nearly covered with red. Flesh white, fine, tender, juicy, sub-acid and refreshing, and generally considered as the highest and best flavored apple grown; splendid appearance, which sells it on sight. Demand always exceeds the supply of McIntosh Red, and commands the highest prices of any apple on the leading American markets. The best box and bushel apple grown, and a good shipper. McIntosh Red is a Canadian apple, keeps long, but is mellow and good to use from the time it is picked and if kept in cold storage until the next crop comes. Tree is exceedingly hardy, vigorous, a very prolific bearer, consistent bumper crop producer, a sure annual cropper—comes into fruiting early. This splendid apple can be grown from Nova Scotia to North Carolina. Growers in New York, New England, Michigan and Canada have long grown McIntosh Red for big profits. Ask any experienced apple grower, if you are not acquainted with the McIntosh Red, and he will praise it as highly as we do. Visit out own bearing commercial orchards of McIntosh Red at Berlin. Plant this variety for the big gold profits.

Maidens Blush—Early fall, one of the most beautiful; pale lemon with crimson cheek; flesh white, tender and crisp. Tree vigorous and good bearer.

MAMMOTH BLACK TWIG (PARAGON)—Winter, extra large in size and round; skin smooth, yellowish, covered with deep red, the general effect being dark red; flesh tender, tinged with yellow, crisp, sub-acid, aromatic, fine flavor, of excellent quality in every way. Very long keeper of great value. An important commercial variety in the East and a good money maker. Tree is vigorous and healthy, yields big crops every year, but necessary plant Delicious or Jonathan as a pollinizer. Picture on cover.

NERO—Winter; here is an apple possessing great merit which has received far too little attention from planters of Eastern orchards. Deep red, with handsome shading; medium large size; of good quality and excellent flavor; one of the longest keepers, one of the best cold storage apples. Apples are graded and packed easily; do not show bruises and hold up well in storage, sell for good prices on the markets. Trees are hardy, extra strong growers, healthy and very productive, as well as a sure cropper.

NORTHERN SPY—Winter. Large, bright scarlet red, with yellow markings. Flesh juicy, rich, crisp, tender, aromatic and highly flavored. Tree a strong, erect grower, very healthy, extremely hardy, and free producer. Blossoms are produced late in the spring, thus escaping frosts. Trees are slow in coming into bearing, but the quality of the fruit largely overbalances this difficulty. Popular old commercial variety in the Northern States, and brings good prices on the Eastern markets. Should not be planted South of Southern Pennsylvania. Northern Spy is one of the best varieties on which to top bud or top graft certain weaker growing varieties.

Northwestern Greening—Fall. Large, round, greenish yellow; juicy, firm, good quality; splendid keeper; ships well. Attractive apple when packed in bushels, demands good prices, excellent baking apple. Should not be planted extensively, because crops are not so certain, due to blossoming early. Trees are extremely hardy, vigorous, bears very young.

Paragon—For description see Mammoth Black Twig.

Red Pearmain—Winter, medium size, yellowish striped with light and dark red, sub-acid, good flavor.

Red Gravenstein—Fall. This red sport is more attractive than Gravenstein. It differs from Gravenstein only in the solid dark red fruit.

Rambo—Fall. An old standard apple, medium sized; yellow, streaked with dull red, flesh tender, crisp and good. Tree a regular and constant bearer, strong and vigorous.

Red Astrachan—Summer. Medium size, yellow with dark red patches; flesh decidedly acid and juicy; excellent for cooking, satisfactory for home plantings, but on account of its poor shipping qualities and irregular bearing not advisable for commercial orchards. Tree very hardy, vigorous and a very heavy bearer every other year.

ROME BEAUTY

ROME BEAUTY—Winter. Large, round; mottled and striped in different shades of red; flavor and quality way above the average; appearance and size are its valuable points; always in strong demand and brings highest prices. Keeps in good condition till May and June. With an established reputation due to real merit, Rome Beauty is a variety Eastern orchardists should plant largely. Good, hardy, strong grower; blooms late; bears heavily every year; is adapted to a wide range of soils, elevations and conditions. Reliability, due to being frost-proof, strong growing, sure bearing, unusual demand, with high prices on the leading markets, especially from the chain stores, make it a favorite with the grower. Fine quality and long keeping for use and for handling make it popular with consumers and dealers. Most attractive when packed in boxes and bushels.

Roxbury Russet—Winter. Large, firm, moderately tender, juicy, sub-acid, good flavor. Skin almost smooth, but covered with greenish to yellowish brown russet; long keeper. Most popular russet apple, tree hardy, strong grower, and a prolific bearer.

Red June (Carolina Red June)—Summer. Medium size, conical, dark red, juicy, fairly good flavor, very productive.

RHODE ISLAND GREENING—Mid-winter. Large, greenish yellow, flesh crisp, juicy, quite acid, firm, fine grained, tender, and of very fine flavor and quality. This large and superior Northern winter apple is famous, and is highly prized for eating and cooking; also valuable commercial variety, an excellent keeper, and a popular barrel apple; always brings good prices. Generally planted in New England, New York, Michigan and Canada, but not advisable to plant south of the Mason-Dixon Line.

Smokehouse—Fall. Large apple of super-fine flavor, excellent for eating, yellowish green mottled with dull red and with many russet dots; flesh firm, crisp, juicy and aromatic. Tree large, vigorous and reliably productive.

STARK—Winter. Long keeper and a reliable commercial sort. Fruit large, round, greenish yellow, with red stripes; flesh yellow, crisp and mildly acid; valuable as a keeper. Excellent baking apple, and always sought by the larger baking concerns and hotels; brings premium prices. A good variety for the commercial orchard because the tree is hardy, thrifty, healthy, one of the strongest growers, a regular bearer; very productive. Desirable trees to top work other sorts on.

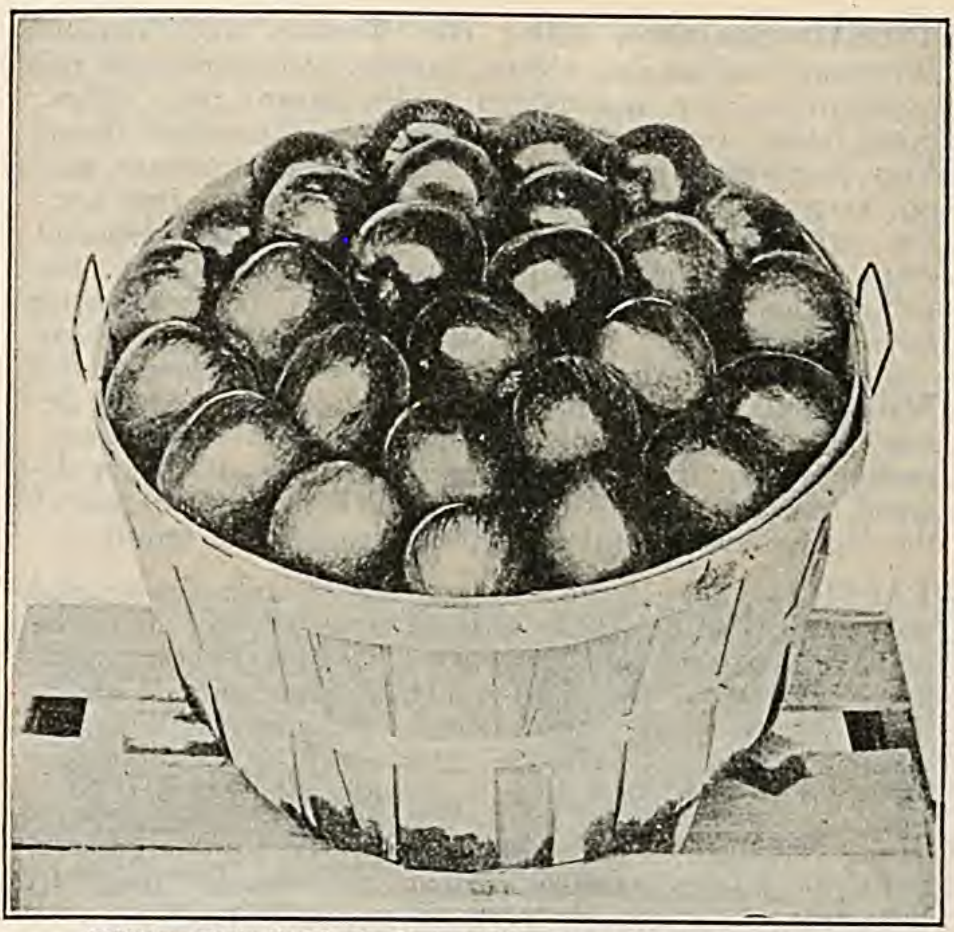
Starr—Summer. Large, attractive, with bright yellowish, smooth skin; sometimes marked with a faint blush and numerous russet dots; flesh yellow, fine, very tender, crisp, juicy, aromatic and of extra fine quality, bringing highest prices. Recommended to those with nearby markets, but a poor long distance shipper. Popular in Southern New Jersey.

STAYMAN WINESAP (STAYMAN)—Winter. Medium large to large; green and yellow, almost hidden by deep, dark red stripes; flesh yellow, not in the least mealy; plenty of juice; firm, tender, rich, sub-acid, aromatic, quality the best and finest. Splendid late keeper, but mellows for use in the fall. Tree a quick and large grower; bears young, often producing a barrel to a tree when five years old. Necessary to plant Grimes Golden along with Stayman for proper cross-pollinization; bears every year; crops uniformly heavy. Stayman is now planted in nearly all the new orchards in the East, to a large extent. One of the most popular apples grown, and demand far exceeds the supply, always bringing highest prices on the large markets; also popular roadside market variety. See picture on inside front page.

Sweet Bough—Summer. Large, pale yellow; tender, sweet.

Twenty Ounce—Winter. Very large, yellow striped with red; fine quality; good keeper.

Wolf River—Winter. Exceedingly large, handsome, bright yellow, skin mottled and blushed with deep red and broad stripes of bright carmine; fair quality, long keeper, and excellent for cooking.



Williams Early Red Is the Best and Most Profitable Early Red Apple

WILLIAMS EARLY RED—Summer. Medium to large size, bright, rich red; flesh is crisp, tender, juicy and sub-acid; good quality. Its bright, attractive red coloring, with satisfactory size and firmness, makes the Williams Early Red the most popular summer variety grown, and always in strong demand with exceedingly high prices. It is ready for market just about the time people are growing hungry for new apples and are willing to pay a handsome premium for real fruit. Fine for a filler or permanent tree, being hardy, and can be successfully grown in New England States and Canada. All commercial orchards should include Williams Early Red.

Wilson Red June—Summer. Fairly large, red; good quality. Popular in New Jersey.

Wagener—Winter. A superior large apple of beautiful bright red; fine texture, high flavor and excellent quality. Trees bear early, and a reliable cropper.

Winter Banana—Winter. Extra large, golden yellow, and beautifully shaded with bright crimson red; firm, fine grained rich, sub-acid. The name suggests the high flavor. Tree thrives nearly everywhere. Should be packed in bushels or boxes and sold soon after picking.

WINESAP—Sometimes called Old Winesap and Virginia Winesap; medium size, oblong, smooth, and a fine dark red—one of the best red colored apples grown; flesh yellow, crisp, tender, very juicy, aromatic, firm and excellent flavor. Very long keeper and considered the best cold storage variety, keeping until July. A strong grower; comes into bearing early and is remarkable for its regular and abundant crops. Grimes should be planted with Winesap for proper pollinization. Winesap has the reputation, being a leader for many years; the name is familiar to everyone. Best box apple grown, which has made it famous in Oregon and Washington; also a wonderful bushel and barrel apple, being extensively grown in Virginia for export and domestic trade. Supply of Winesap is always limited, with heavy demand from the fancy markets, causing Winesap to be one of the highest average priced apples commercially grown.

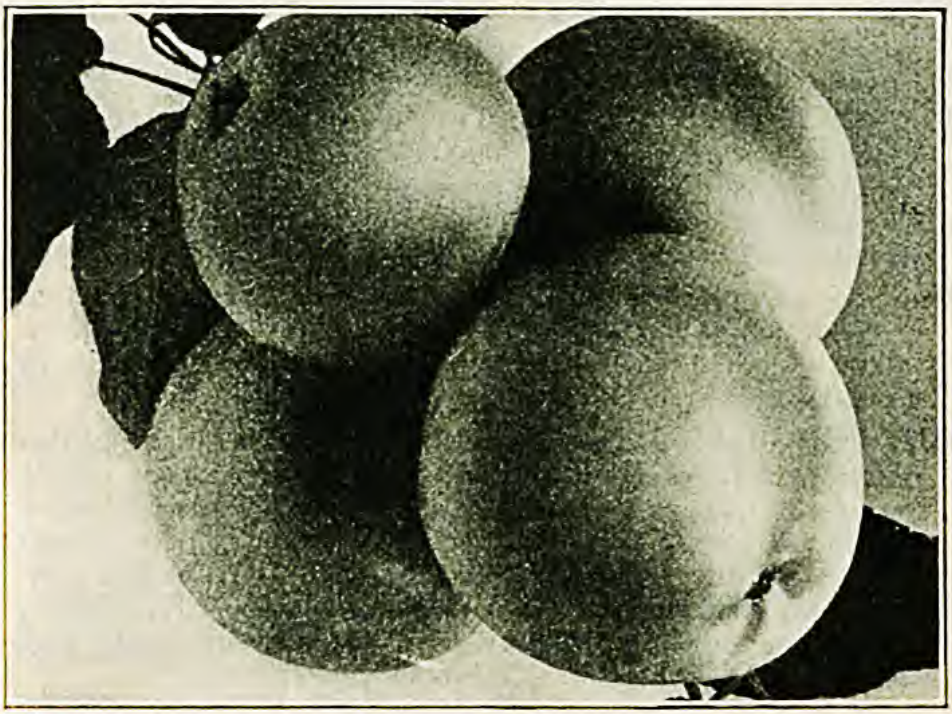
WEALTHY—Fall. Medium to large size, round; almost solid red; flesh white or a little stained; tender, crisp, juicy, fine grained, aromatic and very good flavor. Relative good keeper. One of the most profitable commercial apples. Tree is very hardy, withstanding unusually cold climates, vigorous, fruits at early age, bears regular and abundant crops. Tree somewhat dwarf, making a fine filler.

Yellow Newton or Albemarle Pippin—Winter. Large, round, or a little lop-sided, ribbed and somewhat irregular, long keeper. Tree a slow grower and light bearer in poor soils, but right soil and care bring a world-beater when it will thrive, but no good at all in soils and under conditions not adapted to its exacting requirements. Famous in section around Crozet, Va., and sections of Ore. and Wash. Wonderful box apple, and always brings highest prices.

YORK IMPERIAL—Winter. Medium to large size, round, irregular, greenish yellow overlaid with bright red; flesh tender, firm, crisp, and high flavor; wonderful keeper; can be kept in cold storage until June. Tree is a vigorous grower, strong and healthy; an unusually heavy bearer. Other varieties may fail to set fruit and suffer from off years, but York Imperial, with proper cultural methods, will bear consistently from year to year. York Imperial is the most popular winter variety for cooking; also good for eating; has a national reputation as a strong leader, and favorable demand with average good prices. York Imperial is a wonderful apple for packing in bushels for the domestic trade; is possibly the largest and best selling variety packed in barrels for the export trade, especially European and South American markets. Its long keeping, long distance shipping qualities, attractive color, and being a heavy cropper established York Imperial the leading commercial apple for Southern Pennsylvania, Maryland, West Virginia and Virginia, and generally considered as the best average money maker.

Yellow Belleflower—Winter. Large, yellow, good flavor.

YELLOW TRANSPARENT—Early summer. Medium to large; cream and yellow, tender, juicy, sub-acid, fragrant, good flavor. Trees are very hardy, healthy, somewhat of a dwarf grower, bears very young, fine as a filler, and one of the few varieties that grow and bear bumper crops in Canada as well as Georgia. Yellow Transparent is the first commercial apple on the markets, and ripens when the demand for summer apples is extra strong; consequently it always brings the best prices. There is no competition on the large markets from other varieties, therefore Yellow Transparent is eagerly sought, especially by baking companies and hotels, as it is the best summer cooking apple, with a normal limited supply. The prices are usually the highest of any variety grown. Plant Yellow Transparent and reap your share of the handsome profits.



Yellow Transparent—The Earliest Profitable Summer Apple

CRAB APPLES

Florence—Summer. Carmine red, very hardy.

Hyslop—Deep crimson, large size, sub-acid and of good quality. Fine for all kinds of preserving, canning, etc., and good to eat fresh. Tree handsome.

Martha—Bright yellow, shaded with red; flavor tart but mild.

TRANSCENDENT—Yellow striped with red; good for eating fresh and fine for preserving. Best of all crab apples. Tree large; quick grower.

Whitney—Largest crab apple; smooth, glossy, green, splashed with red; good bearer.

HARRISON-GROWN PEAR TREES

Buds cut from bearing commercial orchards of superior strains, budded on Blight Resistant Pear Seedlings. We specialize in Big, Strong, Vigorous Rooted trees that grow and produce marvelously heavy crops. Quality and Price which will please.

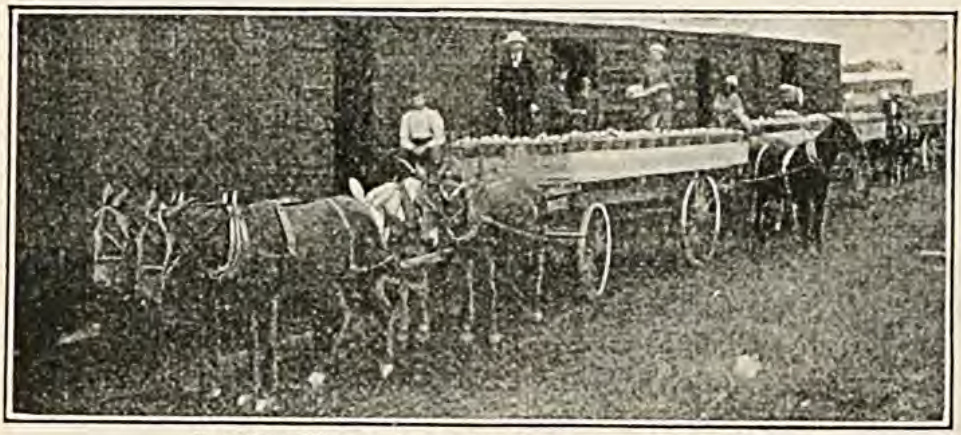
List of Pear Varieties

Anjou (Buerre d'Anjou)—Late fall. Being one of the best known, most popular and profitable late pears. Large, green in color, somewhat yellow when ripe, buttery, melting, rich vinous, good flavor. Tree vigorous, hardy, prolific bearer.

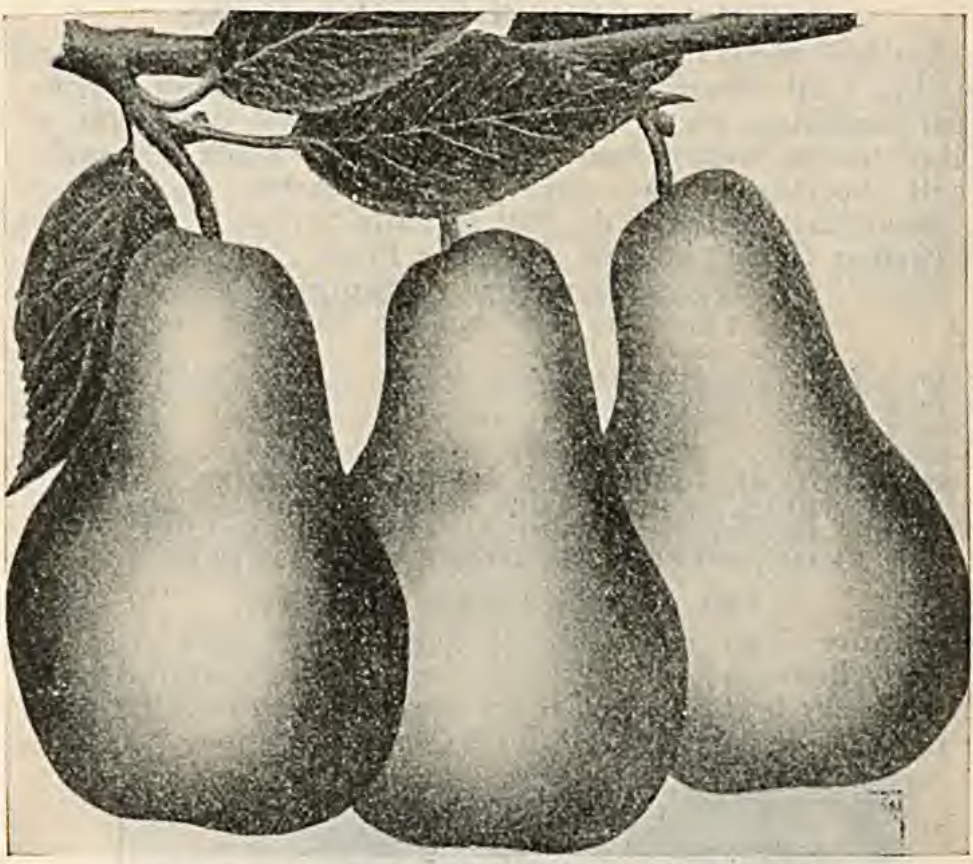
CLAPPS' FAVORITE (Clapp)—Summer. Very large, long, lemon-yellow with brown dots; richly flushed with russet-red on sunny side; fine texture, melting, buttery, juicy, with a rich, sweet, delicate, vinous flavor. Thrives where other varieties fail. Tree hardy and very productive.

Duchess (Duchess D'Angouleme)—Fall. Very large, dull greenish yellow, spotted russet, flesh white, rich, buttery, juicy; excellent flavor. Tree somewhat dwarf, but a most dependable bearer. Profitable commercial pear.

KIEFFER—Fall. Large, handsome appearance, rich, golden yellow, sometimes tinted red on the sunny side; poor flavor; bears largest, most consistent bumper crops. Wonderful keeper and an astounding long distance shipper. Best variety grown for export trade; generally packed in barrels. Leading variety grown commercially for Eastern canneries. Tree hardy, very strong grower, bears at an early age, producing phenomenal crops. Kieffer is a money maker.



Loading Kieffer Pears for Canneries at Berlin



Bartlett Pears—A Heavy Bearer—Excellent Flavor—Best Commercial and Home Variety

BARTLETT—Summer. Large, rich golden yellow, with a light red blush when ripe; buttery, juicy, melting, with a very rich, pleasing flavor. Bartlett is without a peer, having won an international reputation as the best and the most profitable commercial pear and also the finest home orchard variety.

Bartlett pears, when properly grown and packed in boxes, bushels and half-bushel baskets, are most attractive, and find a steady, ready demand with highest prices on the markets. Excellent for fresh eating and unsurpassed for canning. An old favorite.

Garber—Fall. Extra large, even larger than Kieffer; poor flavor, but excellent for canning. Tree is hardy, strong grower; bears at early age; producing large crops. Garber is good pollinizer for Kieffer as well as other varieties.

Lawrence—Winter. Medium to large; golden yellow, with brown dots, melting; pleasant, aromatic; good quality. Unsurpassed as a winter variety.

SECKEL—Fall. A beautiful and delicious little pear, known everywhere and an old-time favorite; skin yellowish brown with deep brownish red cheek; flesh very fine grained, sweet; one of the richest and highest flavored pears grown. Tree rather dwarf, slow, but stout and erect, bears prolific crops.

HARRISON-GROWN CHERRY TREES

Budded from bearing commercial orchards or superior strains. All cherries are budded on French grown, whole root seedlings, which, in our most favorable soil, form a large, fibrous, well proportioned root system, which is exceedingly important for the proper growth of cherries.

Plant cherry trees in the Fall or Early Spring.

Highest Quality at most Attractive Prices.

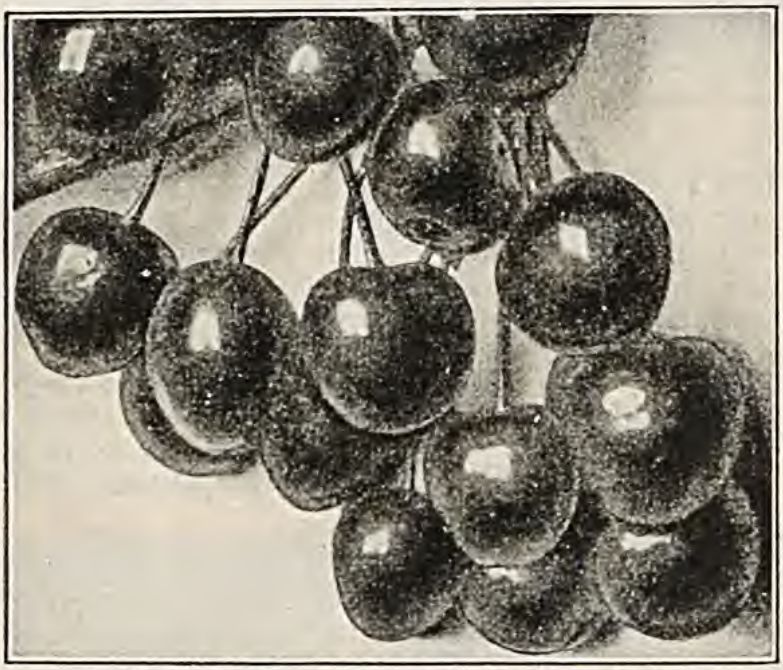
List of Sour Cherry Varieties

Dyehouse—Very early summer, ripening ten days prior to Early Richmond; medium size, sour, good keeper, fine quality, heavy bearer. Popular for pies and especially for canning. Tree is remarkable for its hardiness.



Plant Early Richmond for the Early Commercial Cherry Market

EARLY RICHMOND—Early summer. Very sour, medium size, bright red, being one of the most valuable and popular cherries, unsurpassed for cooking purposes. A good old variety which yields such marvelously heavy crops. Tree is the most hardy of all cherries, being uninjured by the coldest winters; slender in growth, with a roundish, spreading head, being a sure cropper and very productive.

SOUR CHERRIES—Continued

English Morello—Mid-season. Fruit sour, large, elongated, almost blackish red when fully ripe; very rich, acid, juicy and good. Splendid pie cherry, and demanded by fruit juice manufacturers. Tree is very hardy, medium size, but exceedingly productive.

May Duke—Very early. Sour, large, red, juicy, rich, its acidity pleasantly tempered to the advantage of sensitive teeth; superior quality, very productive. An old-time favorite.

MONTMORENCY (LARGE MONTMORENCY)—Mid-season, sour, large, round and red, slightly acid; flesh is very tender and of unusually good quality, being by far the best variety of sour cherries grown. The best shipper of all sours, and with its wonderful carrying ability for long distance shipments, along with its handsome, appetizing appearance and large size, has made Montmorency in a class to itself, always commanding the highest market prices, either on the city markets or from the commercial canneries.
Montmorency is famous in Wisconsin, Michigan, New York and West Virginia for canneries. (See back cover.)

ORANGE—Late, large, bright yellow, excellent flavor, productive, and rarely fails to produce a crop. Best canning variety. Popular Wayne County (New York) strain.

FIGS

Brown Turkey—Medium to large, coppery brown, flesh white, solid. Excellent variety. Not hardy north.

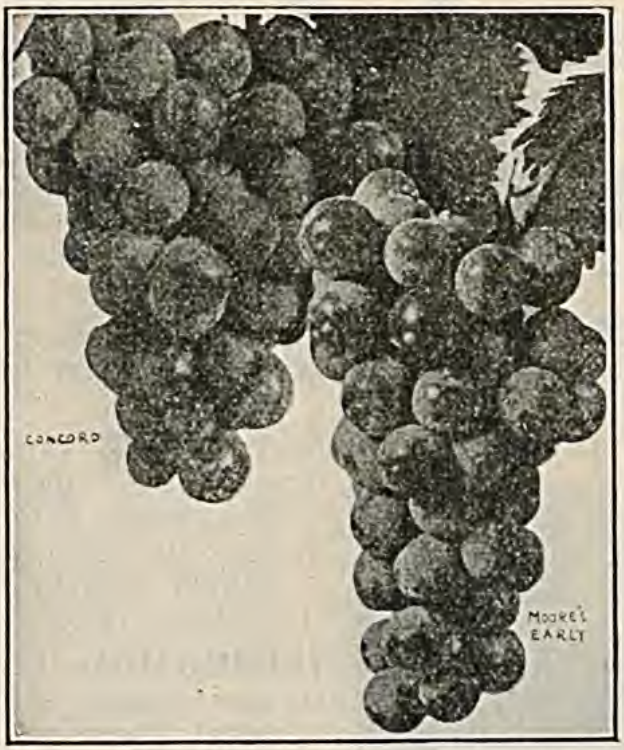
2 to 3 ft.	$ 1.25	$ 1.00 each

HARRISON-GROWN GRAPE VINES

Grapes are one of the most productive fruits we have. They can be grown in small spaces and trained up over buildings or fences. For commercial planting they should be planted in the rows eight feet apart and the rows eight feet apart. Grapes are easily grown and earn the growers large profits. We are listing only the varieties that have been proved as the best in commercial vineyards and home gardens.

Agawam—Large dark red or brown berries, thick skin, aromatic flavor. The vine is a strong rank grower, hardy and productive. Ripens with Concord.

Catawba—Large bunches of dark red berries, flesh pulpy with rich vinous flavor. Best quality for table use. Late.



Concord and Moores Early Are the Leaders

CONCORD—The most popular grape grown. It adapts itself to varying conditions and is grown in most every state of the Union. Large compact bunches of dark purplish black berries. The berries are covered with a rich bloom, skin is tender, but is sufficiently firm to carry to distant markets; flesh is juicy, sweet and tender. Vine is a vigorous grower, hardy and very productive. Mid-season, old reliable commercial variety. Best money maker.

Delaware—Bunches medium size, full of large red berries, which are sweet and of extra good quality. Late.

MOORE'S EARLY—Extremely dark purple, almost black. Bunches medium size, but berries are large. Flavor and quality are very much like Concord but ripens much earlier.

Niagara—The best of the standard, light colored grapes. Bunches of large greenish white berries, changing to a pale yellow color when fully ripe. Ripens about the same time as Concord or a little earlier.

Worden—Large bunches of black colored berries, very highly flavored and of large size, excellent for table use. Ripens five to ten days earlier than Concord.

TWO-YEAR GRAPE VINES

BLACKBERRIES

BLOWERS—Black, large berries, fine quality, very prolific, good shipper. Hardy, unexcelled productiveness, bring highest prices.

EARLY HARVEST—Black, very early, excellent quality, good size, ripens 10 days to two weeks before any other. Favorite commercial berry in Middle Atlantic States. Sells at fancy prices.

Eldorado—The Leading Commercial Blackberry

ELDORADO—Berries of enormous size, shiny jet-black, sweet, pleasing flavor, very productive, excellent shipper. Vines are strong, vigorous, and withstand the cold northwestern winters without injury. Best commercial variety and a wonderful money maker.

Mersereau—Brilliant black, late, very large berries, extra good quality. Heavy producer, extra strong grower.

Snyder—Black, early, medium size, sweet berries. Hardy and enormously productive.

25 plants	100 plants	250 plants	500 plants	1000 plants
$1.75	$5.00	$10.00	$19.00	$35.00

CURRANTS

Fay—Red, mid-season, large berries; good flavor. Excellent for jams, jellies and preserves.

WILDER—Red, late, extra, large, juicy berries, high quality. Best commercial or home variety grown.

1 to 9 plants	$ .25 each
10 to 29 plants	.20 each
30 to 300 plants	.15 each

RASPBERRIES

Columbian—Purple, early, very large, rich flavor, excellent for canning. Bush vigorous, heavy cropper.

CUTHBERT—Crimson red, large conical berries, very hardy, strong grower, prolific bearer, late excellent shipper. Leading commercial variety.

CUMBERLAND—Black, large, firm fruit, very heavy bearer, midseason, good shipper. Leading black commercial variety.

Plum Farmer—Black, large, thick meated berries, strong grower, prolific bearer, early.

ST. REGIS (RANERE)—Red, large berries, everbearing, fruit commences to ripen with the earliest and continues on the young canes until October and sometimes later. Attractive berries, firm, very prolific bearer, excellent shipper. One of the best money making berries commercially.

ASPARAGUS

Plant asparagus in your home garden as there is nothing from the garden that is so much appreciated as the tender tips and fresh stalks of asparagus.

Plant asparagus by the acre as it is a good paying commercial crop.

Barrs Mammoth—Early, large, fast grower, an old favorite.

Conover's Colossal—Large, rapid growing variety, an old variety, being well known and popular.

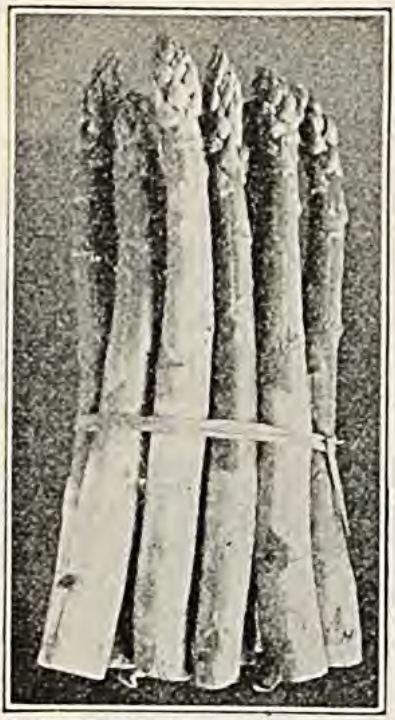
Giant Argenteuil—Earliest, extra large stalks, rich, tender.

PALMETTO—Ten days to two weeks earlier than most other varieties. The stalks vary from dark to light green, are very large and of exceptionally good quality. The most extensively planted and the old reliable commercial variety. A real money maker.

WASHINGTON—A new pedigreed rust resistant asparagus. A standard commercial and home garden variety, being noted for its large size, vigor, productiveness, tenderness, high quality and rust-resistance. Martha Washington and Washington is the same variety. The Coker's Pedigreed strain.

TWO-YEAR AND THREE-YEAR NUMBER ONE GRADE

50c per 10 crowns; $2.00 per 100 crowns; $6.00 per 500 crowns; $10.00 per 1,000 crowns; 2,000 to 5,000 at $9.00 per 1,000 crowns; 5,000 to 10,000 at $8.00 per 1,000 crowns.



Mary Washington Asparagus—Best Commercial Variety

MARY WASHINGTON — The latest introduction of pedigreed strains being rust resistant and proven by test to be the best commercial and home garden variety. A very strong grower, early season, producing extra large, green color, rich, tender stalks, unusually heavy producer, an excellent shipper and commanding the highest market prices. Originated by J. B. Norton of U. S. Dept. of Agriculture. Our supply is grown from the original pedigreed strain, being selected direct by J. B. Norton and Coker's of S. C.

TWO-YEAR AND THREE-YEAR NUMBER ONE GRADE

60c per 10 crowns; $2.50 per 100 crowns; $7.00 per 500 crowns; $12.00 per 1,000 crowns; 2,000 to 5,000 at $11.00 per 1,000 crowns; 5,000 to 10,000 crowns at $10.00 per 1,000 crowns.

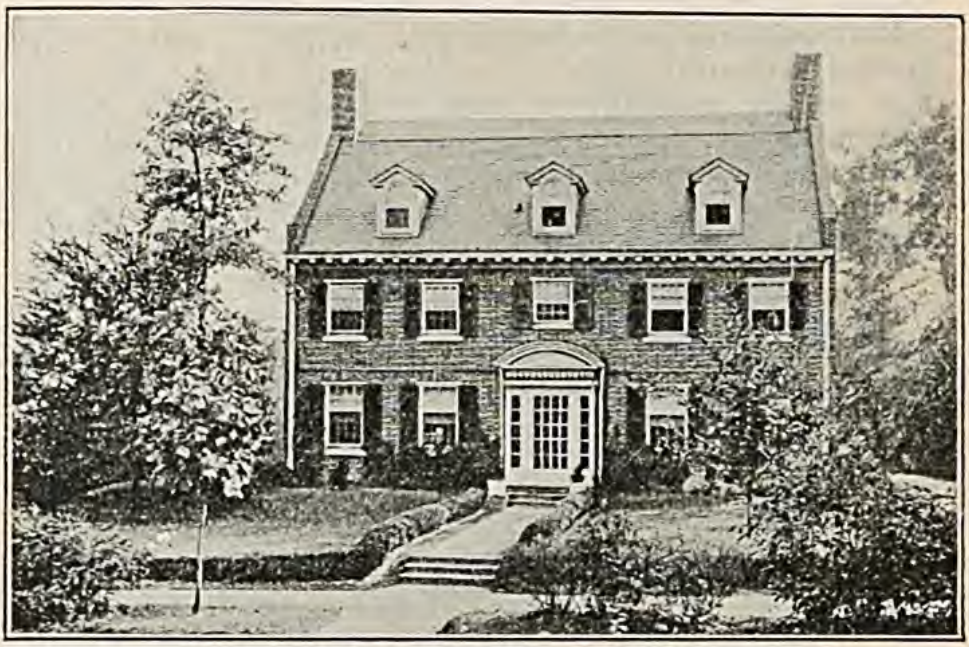
We recommend two-year and three-year asparagus for the best results, but will quote on one-year crowns upon request.

Highest quality asparagus at lowest possible prices.

SUPERIOR QUALITY ORNAMENTAL NURSERY PRODUCTS

Nature was exceedingly kind to the Eastern Shore of Maryland and the naturalists have named it the "Land of Evergreens."

Harrisons' Nurseries, being located in the heart of this famous territory, owning the finest, most fertile lands, being particularly adapted to the super-culture of evergreens, broad-leaved evergreens, shade trees, shrubbery, hedge plants, etc., have taken advantage of Nature's gift as to soil and an ideal climate, being located near the broad Atlantic Ocean, which insures hardiness.



It's Not a Home Until It's Planted

EVERGREENS FOR PERMANENT BEAUTY

We have growing in our own nurseries, America's largest supply of shade trees and one of the largest and most complete assortments of the leading popular varieties of evergreens, with many acres of hedge plants and shrubbery. All ornamental nursery stock is grown under the latest scientific methods under the personal supervision of two of the Harrison Brothers.

HARRISON-GROWN ORNAMENTALS ARE THE BEST

For many years we imported our ornamental nursery stock from Holland and other European countries, but in recent years we have built four large greenhouses in which we propagate now all of our young stock, which is transplanted from time to time and grown properly spaced in the nursery blocks, thus producing specimen stock.

We specialize in growing ornamental nursery stock of the special varieties and high grade suitable for the beautification of lawns, estates, large buildings, streets, highways, real estate and park developments.

UNEXCELLED SHIPPING SERVICE

Harrisons' Nurseries from the very beginning have always endeavored to grow the best and sell it at a popular price, and to give their customers the best service. A large number of experienced nurserymen of twenty years, and some with thirty-five years or more, experience in our employ, along with a large number of younger men, properly trained in the nursery work, are at your service, and along with the large volume of high grade ornamental nursery stock, the best we have ever grown, are waiting to serve you during 1930.

Harrisons' evergreens have a high reputation and have been planted extensively East of the Mississippi River. We believe that we are growing the finest evergreens to be found in America today, regardless of location and price. All of our evergreens are carefully dug, securely sewed with ball and burlap, thus insuring the proper protection, so as to reach their destination in the prime of condition.

LARGEST GROWERS OF SHADE TREES

Harrisons' shade trees can be found on the streets of most any city and along the highways of many states. The rich, loamy soil which we have produces the largest and most fibrous root system that can possibly be grown on shade trees.

We grow hedge plants by the mile and flowering shrubs by the thousands.

IT PAYS TO BUY FROM HARRISONS'

It would pay you in experience as well as profits to visit our nurseries, we believe you will be astounded as to the high quality of ornamental nursery stock which we are producing at such attractive prices, which are almost unbelievable. If you are unable to come in person, then do the next best thing, by mailing your order, which will receive the personal attention of a Harrison. When buying from Harrisons' Nurseries, you are dealing with a large, reliable firm, with forty-six years of continuous and trustworthy service.

Beautiful Lawns and Fruitful Gardens
Make Happy Homes

HARRISON-GROWN EVERGREENS

Of all the plants grown for ornamental planting, none can equal the satisfying richness of evergreens. Planted about the foundations of a house, they hide the sharp outlines of the dwelling and form a very pleasing and striking background for other plants. The value of evergreens in ornamental plantings is most strikingly demonstrated in winter, when other plants have lost their leaves.

Harrisons' evergreens are the finest that can be produced. They are grown in a rich, heavy soil and have been sheared and transplanted several times. All of our evergreens are dug with a solid ball of earth and sewed up with burlap.

Freight is the most satisfactory way to ship evergreens.

ARBORVITAES

American Arborvitae

American Arborvitae (Thuja occidentalis)

The largest seller of all Arborvitaes. It is easy to transplant and grows under adverse conditions. Erect, pyramidal habit, bright green foliage, dense from ground up, rapid grower. Useful for foundation plantings, as a specimen, or planted for hedges. Pictured on front cover.

	1 to 9 Evergreens	10 to 29 Evergreens
10 to 12 in.	$.50	$.45 each
12 to 15 in.	.75	.65 each
15 to 18 in.	1.00	.90 each
1½ to 2 ft.	1.40	1.25 each
2 to 3 ft.	2.00	1.75 each
3 to 4 ft.	3.00	2.75 each
4 to 5 ft.	4.50	4.25 each
5 to 6 ft.	6.00	5.50 each
6 to 7 ft.	8.00	7.25 each

Berkman's Golden Arborvitae (Biota aurea nana)

This is the showiest evergreen in the Arborvitae group. It is dwarf, compact grower, roundish in shape, with golden yellow foliage, most attractive when planted near the entrance to houses.

	1 to 9 Evergreens	10 to 29 Evergreens
6 to 8 in.	$1.00	$.90 each
8 to 10 in.	1.50	1.35 each
10 to 12 in.	2.00	1.75 each
12 to 15 in.	2.50	2.25 each

Chinese Arborvitae (Biota orientalis)

An attractive upright evergreen, rapid grower with bright green foliage. Pictured on front cover.

10 to 12 in.	$.50	$.45 each
12 to 15 in.	.75	.65 each
15 to 18 in.	1.00	.90 each

3 to 4 ft.	3.00	2.75 each
4 to 5 ft.	4.50	4.25 each

Compact Parsons' Arborvitae (Thuja occidentalis compacta)

Almost globe shaped, bright green. Useful in formal plantings.

6 to 8 in.	$.75	$.65 each
8 to 10 in.	1.00	.90 each
10 to 12 in.	1.50	1.35 each
12 to 15 in.	2.00	1.75 each
15 to 18 in.	2.50	2.25 each
18 to 21 in.	3.00	2.75 each
21 to 24 in.	3.50	3.25 each
2 to 2½ ft.	4.25	4.00 each
2½ to 3 ft.	5.00	4.50 each

Conical Arborvitae (Thuja occidentalis conica densa)

Conical shaped, very broad at base with dark green foliage. A very handsome evergreen.

15 to 18 in.	$2.50	$2.25 each
18 to 24 in.	3.00	2.75 each

Ellwangers or Tom Thumb Arborvitae (Thuja occidentalis ellwangeriana)

This evergreen has very fine cut foliage. It grows in a low, broad pyramidal form.

6 to 8 in.	$.50	$.45 each
8 to 10 in.	.75	.65 each
10 to 12 in.	1.00	.90 each
12 to 15 in.	1.25	1.10 each
15 to 18 in.	1.50	1.35 each
18 to 21 in.	1.75	1.50 each
21 to 24 in.	2.25	2.00 each
2 to 2½ ft.	3.00	2.75 each
2½ to 3 ft.	4.00	3.75 each

George Peabody Arborvitae (Thuja occidentalis lutea)

Foliage golden yellow and retained well throughout the year. A distinctive plant for the lawn.

12 to 15 in.	$1.50	$1.35 each
15 to 18 in.	2.00	1.75 each
1½ to 2 ft.	3.00	2.75 each
2 to 2½ ft.	4.00	3.75 each
2½ to 3 ft.	5.00	4.50 each

Freight is the most satisfactory and cheapest way to ship evergreens.

Globular Arborvitae (Thuja globosa)

Natural compact globe shaped, dark green foliage. The ideal low growing plant for massing against the taller evergreens in foundation plantings. (Pictured on front cover.)

	1 to 9 Evergreens	10 to 29 Evergreens
8 to 10 in.	$1.00	$.90 each
10 to 12 in.	1.50	1.35 each
12 to 15 in.	2.00	1.75 each
15 to 18 in.	2.50	2.25 each
18 to 21 in.	3.00	2.75 each
21 to 24 in.	3.50	3.25 each

Oriental Pyramidal Arborvitae (Biota pyramidalis)

Compact, pyramidal shaped with light green foliage. Valuable evergreen.

1 to 1½ ft.	$1.00	$.90 each
1½ to 2 ft.	1.50	1.35 each
2 to 2½ ft.	2.00	1.75 each
2½ to 3 ft.	2.50	2.25 each

Pyramidal Arborvitae (Thuja occidentalis pyramidalis)

A densely branched type of evergreen forming a perfect column. Holds its shape without pruning. Bright green color throughout the whole year. One of the most desirable evergreens grown. (Picture on front cover.)

10 to 12 in.	$.75	$.65 each
1 to 1½ ft.	1.25	1.10 each
1½ to 2 ft.	2.00	1.75 each
2 to 2½ ft.	2.75	2.50 each
2½ to 3 ft.	3.50	3.25 each
3 to 4 ft.	4.50	4.25 each
4 to 5 ft.	5.50	5.25 each

Siberian Arborvitae (Thuja occidentalis siberica)

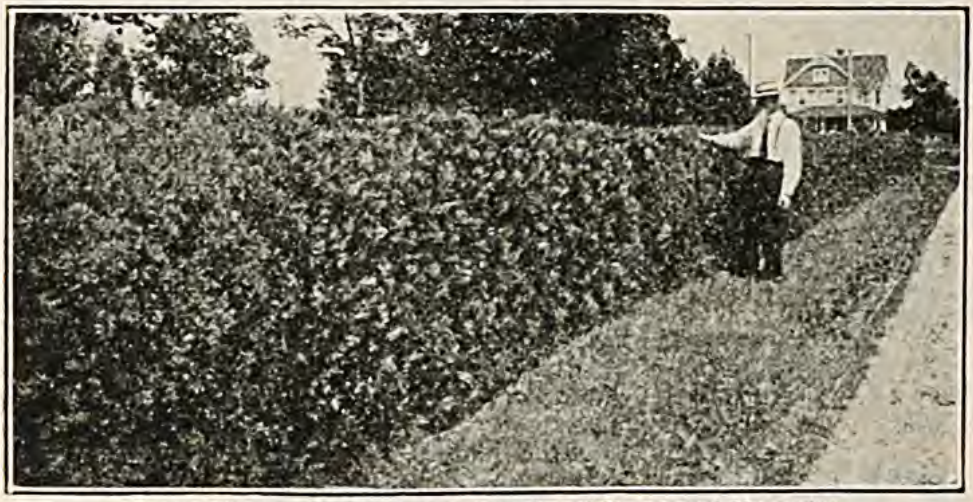
Light green foliage, broadly pyramidal, very hardy and holds green color during the winter.

12 to 18 in.	$2.00 each
1½ to 2 ft.	2.50 each
2 to 2½ ft.	3.25 each
2½ to 3 ft.	4.00 each

Vervaene Arborvitae (Thuja occidentalis vervaeneana aurea)

Variegated greenish yellow foliage, broadly pyramidal, hardy.

12 to 15 in.	$1.50	$1.35 each
15 to 18 in.	2.00	1.75 each
1½ to 2 ft.	2.75	2.50 each
2 to 3 ft.	3.50	3.25 each



Joseph George Harrison, the Founder of Harrisons' Nurseries, Viewing an Arborvitae Hedge

CEDARS

Indian Cedar (Cedrus deodora)

Feathery, blue-green foliage, graceful drooping branches, tall growing. One of our best tall growing evergreen trees. Not hardy north of the Mason-Dixon line.

	1 to 9 Evergreens	10 to 29 Evergreens
12 to 15 in.	$1.50	$1.35 each
15 to 18 in.	2.00	1.75 each

Red Cedar (Juniperus virginiana)

Compact bright green foliage, hardy.

1½ to 2 ft.	$2.00	$1.75 each
2 to 3 ft.	3.00	2.75 each
3 to 4 ft.	4.00	3.75 each
4 to 5 ft.	5.00	4.75 each
5 to 6 ft.	6.00	5.50 each

Virginia Blue Cedar (Juniperus virginiana glauca)

Broadly conical form and beautiful glaucons blue foliage makes it one of the most choicest evergreens.

15 to 18 in.	$3.00 each
1½ to 2 ft.	4.00 each

CYPRESS

Glory of Boskoop Cypress

Tall and slender with feathery, fern-like blue-green foliage. Not hardy north of Maryland.

1½ to 2 ft.	$2.00 each
2 to 3 ft.	3.00 each

FIR

Balsam Fir (Abies balsamea)

Regular symmetrical conical form, dark green leaves, silvery beneath.

1½ to 2 ft.	$3.00	$2.75 each
2 to 2½ ft.	4.00	3.75 each
2½ to 3 ft.	5.00	4.75 each

PINES

Mugho Dwarf Pine (Pinus montana mughus)

Dwarf, compact, globular form. Dark green, dense, needles on upright branches.

12 to 15 in.	$2.50 each

JUNIPERS

Andorra Juniper (Juniperus communis depressa plumosa)

A low spreading Juniper of an unusually good color. During spring and summer it is bright green, turning to a rich purple bronze color in fall and winter. One of the new rare varieties.

9 to 12 in.	$2.00	$1.75 each
12 to 15 in.	2.50	2.25 each
15 to 18 in.	3.00	2.75 each

Creeping Juniper (Juniperus horizontalis)

Branches trail along the ground; good for rock work and ground covering.

1 to 1½ ft.	$2.50	$2.25 each

Golden Spreading Juniper (Juniperus communis aurea)

Low spreading habit, golden foliage, bright in spring.

1 to 1½ ft.	$2.25	$2.00 each
1½ to 2 ft.	3.00	2.75 each

Pfitzer's Juniper (Juniperus chinensis pfitzeriana)

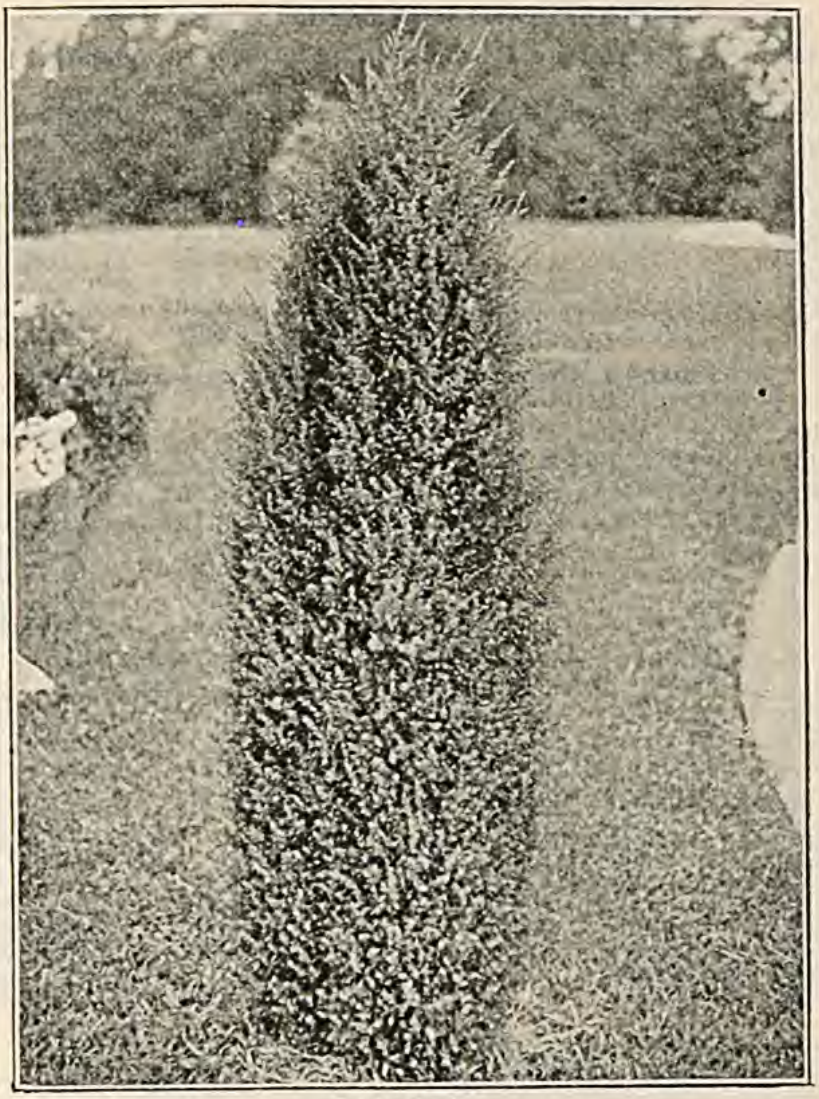
The most popular of all spreading evergreens, grey-green foliage, most attractive in foundation plantings.

1 to 1½ ft.	$2.50	$2.25 each

Savin Juniper (Juniperus sabina)

Handsome dark green foliage, spreading branches forming irregular vase-shaped bush. Fine dwarf ground coverer.

1 to 1½ ft.	$2.50	$2.25 each



Irish Juniper

Irish Juniper (Juniperus communis hibernica)

Forms a narrow and dense column, good for formal effects. Compact, bluish-green foliage; ideal for planting at corners of a home.

	1 to 9 Evergreens	10 to 29 Evergreens
1 to 1½ ft.	$1.00	$.90 each
1½ to 2 ft.	1.50	1.35 each
2 to 2½ ft.	2.00	1.75 each
2½ to 3 ft.	3.00	2.75 each
3 to 4 ft.	4.00	3.75 each

Swedish Juniper (Juniperus communis suecica)

Tall columnar habit, dense, fairly broad foliage, drooping tips, somewhat lighter and bluer than Irish Juniper.

1 to 1½ ft.	$1.00	$.90 each
1½ to 2 ft.	1.50	1.35 each
2 to 2½ ft.	2.00	1.75 each
2½ to 3 ft.	3.00	2.75 each

Spiny Greek Juniper (Juniperus excelsa stricta)

Compact, well shaped pyramid, foliage grey-green. Dwarf grower.

8 to 10 in.	$1.50	$1.35 each
10 to 12 in.	2.00	1.75 each
12 to 15 in.	2.75	2.50 each

RETINOSPORA (Chamaecyparis)

Japanese Plume-Like Retinospora (Retinospora plumosa)

Soft, feathery, light green foliage. Grows in a broad pyramidal shape. Excellent for planting around the foundations of homes.

	1 to 9 Evergreens	10 to 29 Evergreens
1 to 1½ ft.	$1.50	$1.35 each
1½ to 2 ft.	1.75	1.60 each
2 to 2½ ft.	2.25	2.00 each
2½ to 3 ft.	3.00	2.75 each
3 to 4 ft.	4.00	3.75 each
4 to 5 ft.	5.00	4.75 each

Japanese Golden Plume-Like Retinospora
(Retinospora plumosa aurea)

Golden yellow color throughout the summer; compact habit. Ideal for adding a golden color in evergreen plantings.

1 to 1½ ft.	$1.50	$1.35 each
1½ to 2 ft.	1.75	1.60 each
2 to 2½ ft.	2.25	2.00 each
2½ to 3 ft.	3.00	2.75 each
3 to 4 ft.	4.00	3.75 each
4 to 5 ft.	5.00	4.75 each

Japanese Sawara Retinospora (Retinospora pisifera)

Light green, lacy-like foliage, bluish beneath. Quick grower, loosely pyramidal.

5 to 6 ft.	$8.00 each
6 to 7 ft.	10.00 each

Japanese Golden Sawara (Retinospora pisifera aurea)

Habit of growth like the Sawara Retinospora, but its color is bright golden.

1 to 1½ ft.	$2.00	$1.75 each
1½ to 2 ft.	2.50	2.25 each
2 to 2½ ft.	3.00	2.75 each
2½ to 3 ft.	3.50	3.25 each
3 to 4 ft.	4.50	4.25 each

Japanese Retinosporas

Japanese Hinoki Retinospora (Retinospora obtusa)
Compact, pyramidal form, slightly drooping tips, beautiful dark green flat foliage.

	1 to 9 Evergreens	10 to 29 Evergreens
1 to 1½ ft.	$2.50	$2.25 each
1½ to 2 ft.	3.50	3.25 each
2 to 2½ ft.	4.50	4.25 each
2½ to 3 ft.	5.50	5.25 each
3 to 4 ft.	6.50	6.25 each
4 to 5 ft.	7.50	7.25 each

Japanese Sulphur-Tinted Retinospora
(Retinospora plumosa sulphurea)

Light yellow tips with feathery silver blue background. Dwarf grower, suitable for planting in front of taller evergreens.

9 to 12 inch spread	$1.50 each
12 to 15 inch spread	2.00 each

Japanese Thread-Like Retinospora (Retinospora filifera)
Has long, stringy, droopy branches, bright green foliage; slow grower. Very attractive.

12 to 15 in.	$2.25 each
15 to 18 in.	2.75 each
1½ to 2 ft.	3.25 each
2 to 2½ ft.	4.00 each
2½ to 3 ft.	5.00 each

Veitch's Japanese Retinospora (Retinospora squarrosa veitchii)
Foliage silvery blue, feathery and dense, giving a soft, woolly appearance. Broad pyramidal outline; can be kept to any height by trimming. One of the best Retinosporas.

1 to 1½ ft.	$1.50	$1.35 each
1½ to 2 ft.	2.00	1.75 each
2 to 2½ ft.	2.75	2.50 each
2½ to 3 ft.	3.50	3.25 each
3 to 4 ft.	4.50	4.25 each
4 to 5 ft.	5.50	5.00 each
5 to 6 ft.	7.00	6.50 each
6 to 7 ft.	9.00	8.25 each

SPRUCES

Douglas Spruce (Pseudotsuga douglasi)

Very hardy, dark bluish-green color. Conical form with spreading branches; eventually grows into a large tree.

1½ to 2 ft.	$2.50 each
2 to 2½ ft.	3.50 each
2½ to 3 ft.	4.25 each
3 to 4 ft.	5.00 each

Norway Spruce (Picea excelsa)
A lofty, noble tree of open pyramidal habit; green foliage. It is the most popular spruce.

1 to 1½ ft.	$1.25	$1.10 each
1½ to 2 ft.	1.50	1.35 each

YEWS

English Spreading Yew (Taxus baccata repandens)
Low spreading grower, dwarf, with dark glossy green foliage.

12 to 15 inch spread	$2.00 each
15 to 18 inch spread	2.75 each
1½ to 2 feet spread	3.75 each

Japanese Spreading Yew (Taxus cuspidata)
Spreading type, deep green foliage, very hardy. Very attractive when planted around the foundation of houses.

12 to 15 inch spread	$2.25 each
15 to 18 inch spread	3.00 each
1½ to 2 feet spread	4.00 each

HARRISON-GROWN BOXWOOD

Possibly no other evergreen shrub has been so much used for marking the boundaries of formal gardens, to outline flower beds, for low hedges, and for other ornamental purposes. The plants will adapt themselves to almost any situation and climate, and by judicious pruning can be trained to many forms. We believe that our stock of boxwood this year is considerably above the average, being possibly the highest quality available throughout the Union. The plants have been properly cultivated and transplanted, and are therefore in just the condition to grow rapidly when transplanted to your grounds. We are one of America's largest growers of boxwood. Boxwood will be properly dug, balled and burlapped, except customer advising otherwise.

Boxwood on an Old Maryland Estate

Boxwood (Buxus sempervirens)

Handsome shrub of dense, compact growth. Leaves evergreen, quite small, deep glossy green. An ideal plant, more extensively used for shaping in various forms than possibly any other evergreen. (See front cover.)

	1 to 9 Plants	10 to 29 Plants	30 to 300 Plants
8 to 10 in.	$.60	$.55	$.50 each
10 to 12 in.	.80	.70	.60 each
12 to 15 in.	1.00	.90	.80 each
15 to 18 in.	1.50	1.35	1.20 each

Dwarf English Boxwood (Buxus sempervirens suffraticosa)

A widely known and popular dwarf form, evergreen foliage, small, deep green and dense. Suitable for very low hedges and edgings.

4 to 6 in.	$.40	$.35 each
6 to 8 in.	.60	.55 each

Tree Boxwood (Buxus sempervirens arborescens)

Hardy, quickest growing, upright variety of boxwood. Larger leaves being loose growing; pyramidal shape.

15 to 18 in.	$1.00 each
1½ to 2 ft.	1.50 each

HARRISON-GROWN BROADLEAVED EVERGREENS

All varieties will be properly dug, balled and burlapped.

JAPANESE HARDY EVERGREEN AZALEAS

Azalea Amoena

A dense, dwarf-growing shrub with slender branches and semi-double flowers of bright rosy purple color. Blooms in early spring and retains its foliage all year.

	1 to 9 Plants	10 to 29 Plants
6 to 8 in. bushy plants	$1.00	$.90 each
8 to 10 in. bushy plants	1.25	1.10 each
10 to 12 in. bushy plants	1.50	1.35 each

Azalea Hinodegeri

Broad, spreading habit, very bright carmine pink flowers in spring. Beautiful evergreen foliage; one of the most striking colored flowers of any plant grown.

6 to 8 in. bushy plants	$1.25	$1.10 each
8 to 10 in. bushy plants	1.50	1.35 each

Azalea Kurume (Mixed colors)

6 to 8 in. bushy plants, $1.00; 8 to 10 in. bushy plants, $1.25 each.

Azalea Kaempferi

Foliage bright green, flowers varying from coral red to orange pink. 6 to 8 in. bushy plants, $1.00; 8 to 10 in. bushy plants, $1.25 each.

EUONYMUS

Evergreen Burning Bush or Green Euonymus (Euonymus japonica)

Green, glossy foliage; retains it during the year. Upright grower; thrives at seashores.

12 to 15 in.	$.75	$.65 each
15 to 18 in.	1.00	.90 each
1½ to 2 ft.	1.50	1.35 each
2 to 2½ ft.	2.00	1.75 each
2½ to 3 ft.	2.50	2.25 each

Goldspot Euonymus (Euonymus japonicus aureovariegatus)

Grows the same as the Green Euonymus, but its leaves are variegated with golden color. 8 to 12 in., $1.00 each; 12 to 15 in., $1.25 each; 15 to 18 in., $2.00 each; 1½ to 2 ft., $2.25 each.

HOLLY

American Holly (Ilex opaca)

Red berries, evergreen leaves; the most attractive holly grown. 2 to 3 ft., $4.00 each.

Holly-Leaved Mahonia (Oregon Holly Grape) (Mahonia aquifolium)

Handsome shrub with dark, lustrous green, spiny tooth leaves; yellow flowers in spring. 1½ to 2 ft., $2.50 each; 2 to 3 ft., $3.50 each.

Japanese Holly (Ilex crenata)

Shrub with glossy, dark green leaves and black berries. 12 to 15 in., $2.00 each.

Little Leaf Japanese Holly (Ilex crenata microphylla). Grows the same as Japanese Holly, but leaves are smaller. 12 to 15 in., $3.00 each.

LAURELS

English Cherry Laurel (Laurocerasus officionalis)

A valuable shrub of great vigor, beautiful broad shining rich evergreen foliage. Not hardy in the North. 1 to 1½ ft., $1.50 each; 1½ to 2 ft., $2.50 each.

Mountain Laurel (Kalmia latifolia)

Most effective in June, when the clusters of pink flowers open. Good foliage; likes shady locations. 1½ to 2 ft., $1.00 each; 2 to 3 ft., $1.50 each.

HARDY FLOWERING RHODODENDRONS

Carolina Rhododendron (Rhododendron carolinianum)
Low compact grower with pale rosy pink flowers.
8 to 12 in..... $.75 each

Catawba Rhododendron (Rhododendron catawbiense)
Late spring; blooms of rose-lavender.
8 to 12 in..... $.75 each

Rosebay Rhododendron (Rhododendron maximum)
Beautiful, lavish white to blush pink blooms. Large, handsome foliage. Most popular rhododendron.

8 to 12 in.....	$.75 each	2 to 3 ft.....	$2.50 each
12 to 15 in.....	1.00 each	3 to 4 ft.....	3.50 each
15 to 18 in.....	1.25 each	4 to 5 ft.....	4.50 each
1½ to 2 ft.....	1.75 each	5 to 6 ft.....	5.50 each

OTHER LEADING VARIETIES OF BROADLEAVED EVERGREENS AND SHRUBS

Bush Arbutus *(Abelia Grandiflora)*—Most Popular Evergreen Shrub

Bush Arbutus (Abelia grandiflora)
Best evergreen shrub grown; small, numerous pretty white flowers tinged with pink through summer and early fall. Handsome, small, dark green leaves, glossy foliage. Suitable for sunny or shady locations.

	1 to 9 Plants	10 to 30 Plants
1 to 1½ ft. bushy plants.....	$1.00	$.90 each
1½ to 2 ft. bushy plants.....	1.25	1.10 each

Gold Dust Aucuba (Aucuba japonica variegata)
Glossy evergreen leaves, beautifully spotted with yellow.
9 to 12 in..... $1.50 each

Lucidum Glossy Broadleaf Evergreen (Ligustrum lucidum)
Large, thick, shiny, dark green leaves, white flowers, black berries in winter.

12 to 15 in.....	$1.25 each	1½ to 2 ft.....	$3.00 each
15 to 18 in.....	2.00 each	2 to 3 ft.....	4.00 each

Southern Magnolia (Magnolia grandiflora)
Greatest of all Southern ornamental trees. Large, glossy leaves, handsome white flowers.
12 to 15 in..... $1.50 each
15 to 18 in..... 2.00 each
1½ to 2 ft..... 2.50 each

Yucca or Adam Needle
Broad, sword-like evergreen foliage. Tall, creamy white flowers during July.
Field grown extra heavy clumps..... $1.00 each

HARRISON-GROWN SHADE TREES FOR BEAUTY AND SHADE

What is more pleasing than having shade trees around the home. They make a picturesque setting for the house and provide shade in the summer time. A few dollars spent for shade trees will add considerable value to any home.

MAPLES

Norway Maple

Norway Maples (Acer platanoides)

Typical maple leaves, large and bright green, fading to gold in the fall. Trunk and branches are sturdy and strong, lending an effect of ruggedness. Branches and foliage are thick and compact. It is the most popular and best known shade tree.

5 to 6 ft.	$1.25 each	$10.00 per 10
6 to 8 ft.	1.75 each	15.00 per 10
8 to 10 ft.	2.50 each	22.50 per 10

Schwedlers Red Leaved Maple (Acer platanoides schwedleri)

Very similar to the Norway Maple, except in spring the leaves are purple and crimson, in summer months dark green, and when fall comes the leaves change to a brown-reddish color.

5 to 6 ft.	$1.50 each	$12.50 per 10

Japanese Blood Leaf Maple (Acer palmatum atropurpurem)

Very dwarf, graceful red foliage. Best color in sunny locations.

15 to 18 in. ..... $5.00 each

Silver Maple (Acer dasycarpum)

The name comes from the color of its leaves; on the underside of them they are bright silvered color; on top light green, and in the fall the leaves fade to pale yellow. Growth is faster than that of any other shade tree. Makes splendid, quick shade.

6 to 8 ft.....	$.70 each	$6.00 per 10	$50.00 per 100
8 to 10 ft.....	.90 each	8.00 per 10	70.00 per 100

Red or Scarlet Maple

Brilliant red color in early spring changing to light green color in summer months.

6 to 8 ft..... $1.00 each

ELMS

American Elm—A Noble Tree

American Elm (Ulmus americana)

A noble native tree of great size, wide spreading, gracefully curving branches, growing up in a form like the outline of long-stemmed flowers in a tall vase. The handsomest American tree for lawns, avenues and parks.

6 to 8 ft.....	$1.00 each	$9.00 per 10	$80.00 per 100
8 to 10 ft.....	1.50 each	13.50 per 10	120.00 per 100

Moline Elm

Grows into a dense conical specimen.

6 to 8 ft..... $2.00 each

OAKS

Pin Oak (Quercus palustris)

The daintiest and most graceful of the oaks, with deeply cut, bright, fresh green foliage; beautiful autumn effect. A very graceful tree for the lawn and fine for streets or roadsides.

6 to 8 ft.....	$3.00 each		$27.50 per 10
8 to 10 ft.....	4.00 each		37.50 per 10

Red Oak (Quercus rubra)

Stately, broad open head with purplish-brown leaves during fall.

6 to 8 ft.....	$3.00 each		$27.50 per 10
8 to 10 ft.....	4.00 each		37.50 per 10

PLANES

Oriental Plane—A Beautiful Tree

Oriental Plane (Platanus orientalis)

A rapid, upright, clean growing tree, long lived, beautiful dense foliage. It is very hardy and not affected by insects. The bark peels off the trunk and branches in autumn, leaving the whole tree of creamy white color in winter. It is the ideal tree for planting on lawns, avenues and parks. Rapid grower.

6 to 8 ft.....	$1.00 each	$9.00 per 10	$80.00 per 100
8 to 10 ft.....	1.50 each	12.50 per 10	120.00 per 100

WILLOWS

Babylonian Weeping Willow (Salix babylonica)

A rapid growing, hardy tree, thriving in any moist soil. The willows are valuable and interesting subjects on account of their graceful aspect.

6 to 8 ft.....	$1.25 each	$11.00 per 10

Golden Bark Weeping Willow

Similar in habit and growth to the Babylonian Weeping Willow, except the bark is of a golden color, making a showy effect in the winter time.

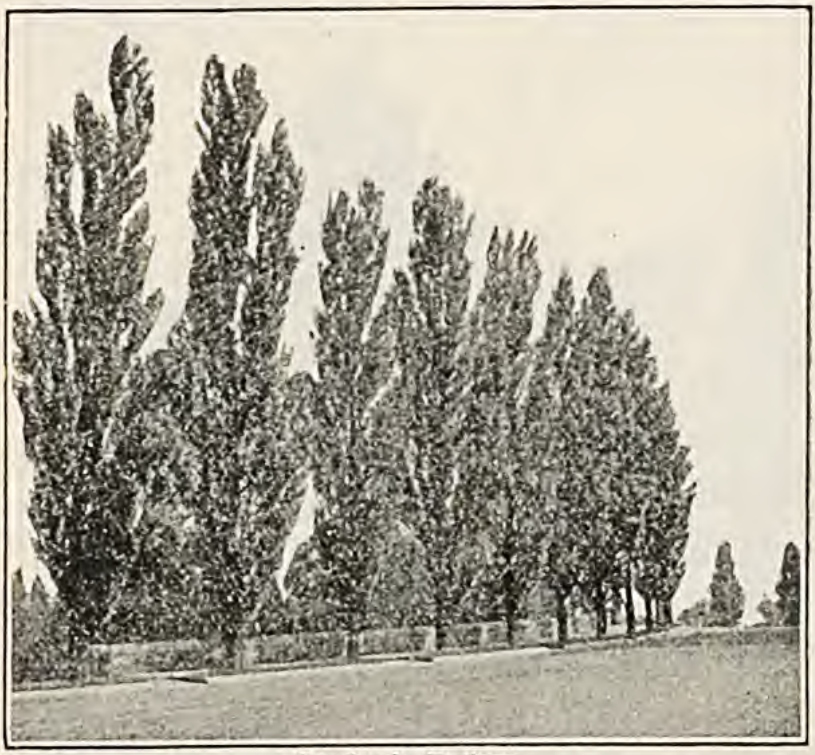
6 to 8 ft.....	$1.25 each	$11.00 per 10
8 to 10 ft.....	1.50 each	13.50 per 10

Pussy Willow (Salix discolor)

Shrub-like tree with furry catkins in early spring.

2 to 3 ft.....	$.35 each	$3.00 per 10

POPLARS



Lombardy Poplars

Lombardy Poplar (Populus nigra italica)
A tall, spire-like tree used for screens and formal plantings. It is fast growing, distinctly ornamental and beautiful.

6 to 8 ft.....	$.70 each	$6.00 per 10	$50.00 per 100
8 to 10 ft.....	.90 each	8.00 per 10	70.00 per 100

OTHER SHADE TREES

Catalpa Bungeii or Umbrella Tree
Umbrella-shaped heads without pruning. Hardy, have large, glossy green leaves; usually planted in pairs on opposite sides of an entrance or walks. (For picture see page 59.)

5 to 6 ft., 2-year heads.....	$1.25 each	$11.00 per 10
6 to 7 ft., 2-year heads.....	1.50 each	13.50 per 10

Cut Leaf Weeping Birch (Betula pendula gracilis)
Graceful, drooping habit, silver-white bark.
5 to 6 ft..... $3.00 each

European Linden (Tilia platyphyllos)
Pyramidal in form; its abundant foliage forms a dense shade; flowers fragrant.
6 to 8 ft..... $2.00 each 8 to 10 ft..... $3.00 each

European Mountain Ash (Sorbus aucuparia)
Valuable for a small lawn; orange scarlet berries.
4 to 5 ft..... $.75 each

Maiden Hair Tree or Ginkgo (Ginkgo biloba)
A tall and very hardy tree, with horizontal branches.
6 to 8 ft..... $2.50 each

Sweet Gum (Liquidambar styraciflua)
A shapely tree with slender, corky-ridged branches. Leaves are bright green and lustrous; in autumn they change to a pleasing tone of crimson color.

6 to 8 ft.....	$2.00 each	$17.50 per 10
8 to 10 ft.....	3.00 each	27.50 per 10

Teas Weeping Mulberry

Long, sweeping branches that droop and touch the ground; very attractive.

4 to 6 ft. stems, 2 year heads..... $3.00 each

Texas Umbrella Tree (Melia azedarach umbraculiformis)

A rapid grower, with handsome shaped, beautiful flowers and attractive fruit. The flowers are lilac-colored, and come in April in graceful panicles, and are followed by yellowish opaque berries. Dense, round, spreading umbrella-like heads.

2 to 3 ft.....	$.50 each	$4.50 per 10	$35.00 per 100
3 to 4 ft.....	.75 each	6.50 per 10	55.00 per 100
4 to 5 ft.....	1.00 each	9.00 per 10	75.00 per 100

Can supply larger sizes in the various varieties of shade trees. Write for special prices.

NUT TREES ARE ORNAMENTAL AND PROFITABLE

Butternut (Juglans cinerea)

Large nut, with a sweet, oily, nutritious kernel.

2 to 3 ft..... $1.50 each $13.50 per 10

American Sweet Chestnut (Castanea dentata)

Large tree when matured; nut of good quality; prolific bearer.

2 to 3 ft..... $1.50 each $13.50 per 10

Delicious Nuts Are Enjoyable

Schley Pecan

Medium to large nuts; oblong, thin shell, rich flavor. Good grower. The best pecan grown.

2 to 3 ft..... $2.50 each $22.50 per 10

Black Walnut (Juglans nigra)

Rapid grower, spreading branches, large, delicious nuts, prolific bearer.

	1 to 9 Trees	10 to 29 Trees
2 to 3 ft.....	$1.00	$.90 each
3 to 4 ft.....	1.50	1.35 each
4 to 5 ft.....	2.00	1.75 each
5 to 6 ft.....	3.00	2.75 each

English Walnut (Juglans regia)

Thin shelled, large, delicious nuts, producing heavy crops and demanding good prices. Most popular walnut grown.

2 to 3 ft..... $1.50 each $13.50 per 10

HARRISON-GROWN FLOWERING ORNAMENTALS

Flowering Almond

Showy double flowers in spring; makes a beautiful specimen when in bloom. We can supply it in either pink or white color.

1½ to 2 ft..... $.50 each 2 to 3 ft..... $.70 each

Japanese Double Flowering Cherry

A profusion of double white blooms in early spring.

1 to 2 ft..... $1.25 each 2 to 3 ft..... $2.00 each

Betchels Double Flowering Crab Apple (Malus ioensis plena)

Large, double, pink, fragrant flowers, blooming in May. A most desirable flowering tree.

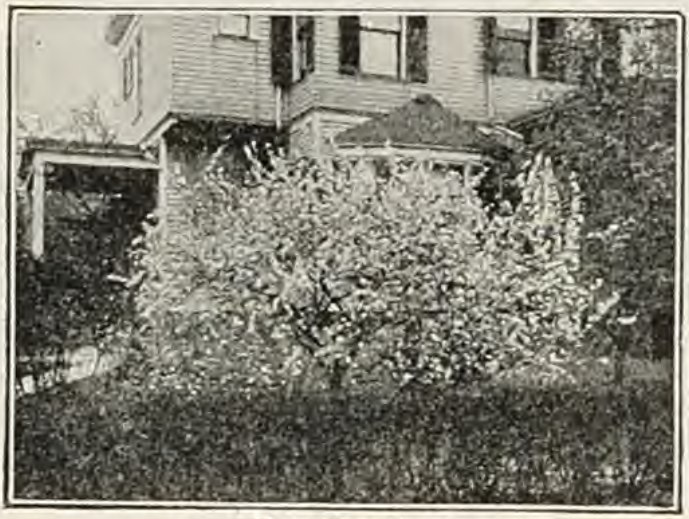
Judas Tree or Red Bud (Cercis canadensis)

Rich, rosy pink flowers in early spring. Effective with evergreens.

2 to 3 ft..... $.75 each
3 to 4 ft..... 1.00 each
4 to 5 ft..... 1.50 each



Flowering Peach

Flowering Peach

Very beautiful, large, double blooms in the spring time. The ideal low-priced flowering tree. We can supply the flowering peach in two colors—white or red.

2 to 3 ft..... $.40 each 3 to 4 ft..... $.50 each
4 to 5 ft..... .60 each 5 to 6 ft..... .75 each

Purple Leaved Plum (Prunus pissardi)

One of the most desirable purple leaved trees. Holds color throughout summer; a fine specimen for bringing color into a shrubbery border.

Purple Leaved Othello Plum

Upright grower, foliage brilliant reddish purple, holding its color throughout season. Prolific bearer, with crimson fruit producing ornamental effect.

PRICES ON BOTH VARIETIES PURPLE LEAVED PLUMS

2 to 3 ft..... $.50 each 3 to 4 ft..... $.75 each
4 to 5 ft..... 1.00 each 5 to 6 ft..... 1.25 each

HARRISON-GROWN HARDY FLOWERING SHRUBS

This group of plants is very necessary; to them we come for the finishing touches of the landscape planting. The border outlines and shade have been provided with trees and evergreens, and with the shrubs we add the softening touches to the planting. By careful selection of varieties, different colors of bloom can be had throughout the growing season. In winter we have the beauty of the different colored branches and the clinging of various fruits to the twigs.

Althea or Rose of Sharon

Althea or Rose of Sharon (Hibiscus syriacus)

A tall shrub with upright or slightly spreading branches. The double and single flowers are formed in varying colors. We can supply purple, double lavender, semi-double white with crimson center and single white.

	1 to 9 Plants	10 to 29 Plants
1½ to 2 ft.	$.35	$.30 each
2 to 3 ft.	.50	.40 each
3 to 4 ft.	.65	.55 each

African Tamarisk

Feathery, gray-green foliage; effective near water. Thrives at seashore.

1½ to 2 ft.	$.40 each
2 to 3 ft.	.50 each
3 to 4 ft.	.60 each

Beauty Bush (Kolkwitzia amabilis)
Pink tubular flowers, heavy bloomer, hardy; the best new shrub introduced in many years. 1½ to 2 ft., $1.50 each.

Butterfly Bush (Buddelia magnifica)
Bushes grow from three to four feet tall and are crowned with long racemes of lilac-colored flowers in mid-summer. Its honeyed fragrance attracts the butterflies. Tops die back during winter. 1½ to 2 ft., $.30 each; 2 to 3 ft., $.40 each.

Crepe Myrtle (Lagerstroemia indica)
Small, green, glossy leaves; very beautiful showy flowers during mid-summer to fall; noticeable object in any landscape. Not hardy north of Mason-Dixon line, but most popular Southern shrub. Pink and red varieties.

1½ to 2 ft.	$1.50 each
2 to 3 ft.	2.00 each
3 to 4 ft.	3.00 each

DEUTZIAS

Handsome flowered shrubs of low and medium height for the garden or border. The flowers may be cut for house decorations in early summer.

Pride of Rochester Deutzia
Double white flowers, which are slightly tinged with rose; appear in mid-June. 1½ to 2 ft., $.30 each; 2 to 3 ft., $.40 each; 3 to 4 ft., $.50 each.

Slender Deutzia (Deutzia gracilis)
Dwarf grower; white flowers cover the entire plant. For base planting and edging. 12 to 15 in., $.40 each; 15 to 18 in., $.50 each.

Snowflake Deutzia (Deutzia scabra candidissima)
Vigorous, graceful grower; double white flowers. One of the best. (See inside back cover.)

1½ to 2 ft.	$.30 each
2 to 3 ft.	.40 each
3 to 4 ft.	.50 each

DOGWOODS

Strong growing shrubs, attractive for their wealth of flowers as well as abundant berries, leaf coloring in summer and fall, and their bright colored branches in winter.

Golden Twig Dogwood (Cornus stolonifera flaveramea)
Dwarf grower; branches are golden in color; most attractive in winter. 1 to 1½ ft., $.40 each; 1½ to 2 ft., $.50 each.

Red Branched or Coral Dogwood (Cornus alba siberica)
Bright red bark, white flowers, blue fruit; rapid grower; beautiful winter effect. 1½ to 2 ft., $.30 each; 2 to 3 ft., $.40 each; 3 to 4 ft., $.55 each.

Red Flowering Dogwood (Cornus florida rubra)
One of the most popular small ornamental trees. Handsome red flowers in early spring. Makes an attractive lawn specimen. 1½ to 2 ft., $2.50 each.

White Flowering Dogwood (Cornus florida)
One of native spring flowering small trees, with white flowers and bright red berries in fall. 2 to 3 ft., $.75 each; 3 to 4 ft., $1.00 each; 4 to 5 ft., $1.25 each.

Globe Flower (Kerria japonica flore-plena)
Brilliant double yellow flowers borne on extremely vigorous growing plants. 1½ to 2 ft., $.75 each.

Golden Bell (Forsythia)
Vigorous, upright grower; profusion of yellow flowers in early spring. One of our best early blooming shrubs. (See cover.)

1½ to 2 ft.	$.30 each
2 to 3 ft.	.40 each
3 to 4 ft.	.50 each

Golden Bell Weeping (Forsythia suspensa)

Very long, curving branches, superbly adapted to covering arches and trellises; yellow flowers in early spring. 1½ to 2 ft., $.40 each; 2 to 3 ft., $.50 each.

Golden Chain (Laburnum vulgare)

A tall shrub or small tree with yellow flowers in drooping racemes. 2 to 3 ft., $1.00 each; 3 to 4 ft., $1.50 each; 4 to 5 ft., $2.00 each.

BUSH HONEYSUCKLES

The upright honeysuckles have pretty bright flowers, and later showy berries throughout the fall. Should be used in shrub groups.

Fragrant Honeysuckle (Lonicera fragrantissima)

Fragrant white flowers, sometimes bursting into bloom in January. Holds green leaves into winter. 1½ to 2 ft., $.40 each.

Japanese Bush Honeysuckle (Lonicera morrowii)

Early white flowers, followed by red berries. 1½ to 2 ft., $.35 each.

Tartarian Honeysuckle (Lonicera tatarica)

Very attractive in blossom, producing an abundance of flowers followed by red fruit. Endures partial shade. We offer pink, white and red varieties. 1½ to 2 ft., $.40 each; 2 to 3 ft., $.50 each.

HYDRANGEAS

Among the best and most popular shrubs; valuable for their wealth of late summer blooms. Thrives at seashores as well as other locations.

Hydrangea Pee Gee (Hydrangea paniculata grandiflora)

Large flowers; first snowy white, then pink, changing to reddish bronze in the fall. Blooms from middle summer until fall. Best selling variety of hydrangeas grown. 1½ to 2 ft., $.40 each; 2 to 3 ft., $.50 each; 3 to 4 ft., $.75 each.

Field of Hydrangeas

Hills of Snow (Hydrangea arborescens grandiflora)

Huge, dense balls of small white flowers in June and July. Endures partial shade. 1½ to 2 ft., $.40 each; 2 to 3 ft., $.50 each; 3 to 4 ft., $.75 each.

Pink or Blue Hydrangea (Hydrangea otaksa)

Old favorite southern hydrangea; not hardy in the north. Large balls of pink or blue flowers; very attractive large leaves. Color depends on acidity of soil.

Two-year field grown..... $.75 each

Indian Currant or Coral Berry (Symphoricarpos vulgaris)

Dwarf; coral red berries until late winter; thrives in shade. (See inside back cover.)

1½ to 2 ft..... $.35 each

Japanese Quince (Cydonia japonica)

Scarlet flowers in April and May. No doubt one of the most attractive spring blooming shrubs.

1½ to 2 ft..... $.60 each 2 to 3 ft..... $.75 each

LILACS

Common Lilac (Syringa vulgaris)

Old-fashioned variety so familiar in old gardens. We can furnish in either purple or white colors.

1½ to 2 ft..... $.50 each

French Hybrid Lilacs

These named lilacs are marvels of beauty and elegance, far superior to the older varieties. The following varieties are considered to be the very best of their respective colors:

Charles X—Single, purplish red flowers.
Hugo Koster—Purple flowers, best one of all purple lilacs.
Ludwig Spaeth—Single, very rich dark purplish red.
Marie Legraye—Single, best type of white lilac.
Michael Buckner—Dwarf, double, beautiful trusses of pale lilac color.
Mme. Lemoine—Double, pure white.
President Grevy—Double, bright blue.

	1 to 9 Shrubs	10 to 29 Shrubs
1 to 1½ ft.....	$.60	$.55 each
1½ to 2 ft.....	.75	.70 each

Persian Lilac (Syringa persica)

A tall growing shrub with slender branches; blooms in May and June. We offer two colors, white and purple.

1 to 1½ ft..... $.50 each 1½ to 2 ft..... $.65 each

Villosa Lilac

Fragrant purplish white blooms; valuable for its lateness of bloom.

1 to 1½ ft..... $.50 each 1½ to 2 ft..... $.65 each

MOCK ORANGE

Garland or Sweet Mock Orange (Philadelphus coronarius)

Of upright habit, and produces in June a wealth of white fragrant flowers.

1½ to 2 ft..... $.40 each
2 to 3 ft..... .50 each
3 to 4 ft..... .65 each

Large Flowered Mock Orange (Philadelphus grandiflorus)

Has large, showy flowers, somewhat fragrant; a rapid grower.

1½ to 2 ft..... $.40 each

Virginal Mock Orange

Magnificent variety, sweetly fragrant, semi-double, white flowers.

1½ to 2 ft..... $.60 each

Scotch Broom (Cytissus scoparius)

Thin, green branches, yellow flowers; very attractive.

1½ to 2 ft..... $.40 each
2 to 3 ft..... .50 each
3 to 4 ft..... .75 each

SNOWBALLS

Common Snowball (Viburnum opulus sterile)

The old-fashioned snowball; large globular clusters of snow-white flowers in May and June; makes a very attractive shrub.

1½ to 2 ft..... $.50 each

Fragrant Snowball (Viburnum carlesi)

The fragrant, spicy flowers are borne in May and June. Buds before opening are an attractive pink, developing to pure white flowers.

12 to 15 in..... $1.75 each

Japanese Snowball (Viburnum tomentosum plicatum)

This is one of the most attractive shrubs grown. Its pure white blossoms, with heavy dark leaves, make it show up remarkably well when planted as a specimen or in a shrub group.

1½ to 2 ft..... $.75 each

Snowberry (Symphoricarpos racemosus)

A slender branched, upright growing shrub, with small pink flowers, followed by showy, pure white berries, which cling to the branches during fall and winter.

1½ to 2 ft..... $.40 each

Sweet Scented Shrub or Carolina Allspice (Calycanthus floridus)

Reddish brown flowers, spicy, fragrant; June to September.

1½ to 2 ft..... $.60 each

SPIREAS

Anthony Waterer Spirea

Dwarf grower; bright pink flowers in June and July. Very valuable for edging in front of other shrubbery.

1 to 1½ ft..... $.40 each

Billardi Spirea

Long spikes of rose-pink flowers in mid-summer.

1½ to 2 ft..... $.40 each 2 to 3 ft..... $.50 each

Thunberg's Spirea (Spirea thunbergii)

White flowers in early spring, against a background of feathery yellowish green foliage. Most attractive.

1½ to 2 ft..... $.50 each

Spirea Van Houttei

Van Houttei Spirea

The most popular shrub. It is valuable as specimen in groups, in border planting and for hedges. The branches are slender, drooping, covered with white flowers in April or early May. It grows six to eight feet, and is unsurpassed in gracefulness and beauty.

1½ to 2 ft.....	$.25 each	$2.00 per 10
2 to 3 ft.....	.35 each	3.00 per 10

Smoke Tree or Purple Fringe (Rhus cotinius)
The blooms have a peculiar fluffy aspect, and because of the color, which is pale purple, they give the whole tree the appearance of a cloud of smoke. 1½ to 2 ft., $.90 each.

WEIGELAS

Beautiful shrubs that bloom in June and July. The flowers are produced in so great profusions that they almost entirely hide the foliage. They are very desirable for border or for grouping, and as specimen plants for the lawn.

Eva Rathke Weigela
Very attractive deep carmine red flowers, making a very showy shrub. (See inside back cover.) 1½ to 2 ft., $.40 each; 2 to 3 ft., $.50 each.

Henderson Weigela
Quick grower; pink flowers.

1½ to 2 ft.	$.25 each
2 to 3 ft.	.40 each
3 to 4 ft.	.50 each

Pink Weigela (Weigela rosea)
The most popular weigela sold today. Its delicate, pink, bell-shaped flowers are borne in great profusion along arching branches.

1½ to 2 ft.	$.25 each
2 to 3 ft.	.40 each
3 to 4 ft.	.50 each

White Kerria or Jet Bead (Rhodotypos kerriodes)
Single white flowers in the spring, followed by shining, black-colored berries. 1½ to 2 ft., $.60 each.

HARRISON-GROWN HEDGE PLANTS FOR UTILITY AND BEAUTY

Many people do not realize the value of an attractive hedge and how it will increase the worth of their grounds. A hedge of any of the selected plants listed here will add dollars to the value of your home and make its appearance more charming.

Golden Variegated Privet (Ligustrum ovalifolium variegatus)
Very similar to California Privet, except the leaves are variegated with golden color. Most attractive. 1 to 1½ ft., $.50 each; $4.00 per 10.

Lodense Privet (Ligustrum nanum compactum)
Hardy, low, dense, slow-growing privet; suitable for formal hedges. 1 to 1½ ft., $.20 each; $1.75 per 10.

Japanese Privet (Ligustrum japonicum)
Beautiful evergreen shrub, dense symmetrical outline. Creamy white flowers, followed by purplish berries.

1 to 1½ ft.	$.20 each	$1.75 per 10
1½ to 2 ft.	.30 each	2.50 per 10
2 to 3 ft.	.50 each	4.00 per 10
3 to 4 ft.	.75 each	6.50 per 10

Japanese Barberry (Berberis thunbergii)
Best low, dense hedge plant grown. Its abundant, small, light green leaves, which turn to rich colors in autumn, and its wealth of scarlet berries make it very attractive. Extremely hardy, and requires but little pruning. Ornamental and graceful the whole year. (See inside back cover.)

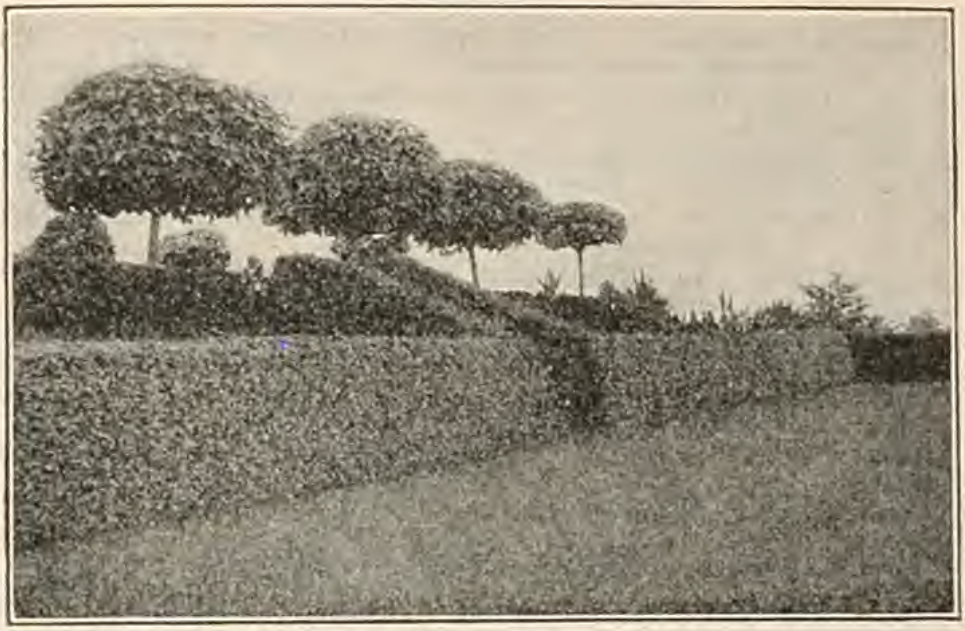
Red Leaved Barberry (Berberis thunbergii atropurpurea)
A new variety; bright, reddish-purplish foliage. Should be planted in sun for best color. 8 to 12 in., $.60 each; $5.00 per 10; $45.00 per 100.



California Privet Hedge and Catalpa Bungei Trees
(Umbrella Trees.) (See Page 50)

California Privet (Ligustrum ovalifolium)

The best of all hardy hedge plants. Can be easily kept at any height desired; has glossy, deep green leaves, and holds them until late fall. Its strong, quick, upright growth makes it useful for screening out unsightly objects.

	1 to 9 Plants	10 to 29 Plants	30 to 299 Plants	300 to 3000 Plants

Choice Mixed Gladiolus

A mixture of several standard varieties; all colors.

$.60 per 10 $5.00 per 100 $40.00 per 1000

VINES FOR ORNAMENT

For covering unsightly objects, stumps, rocks, etc.; vines are always valuable. As porch draperies they keep off the sun and provide a cool, shady place where it is a comfort to sit. For covering walls of buildings they possess a distinct worth, for they take away the bare appearance and give the mellow effect that is usually produced by age alone. A half dozen vines cost so little that everyone should have them, adding their beauty to the rest of the plantings and to the buildings.

Boston or Japanese Ivy (Ampelopsis veitchi)

A popular climber, clinging firmly to brick, stone or other material. Deep, glossy, green ivy-shaped foliage which turns to cream and gold color in autumn.

Strong 2-year plants..... $.55 each $5.00 per 10

Hybrid Clematis

These are improved clematis of the large flowering type. Every home should have some.

Henry Clematis—Large, waxy, pure white flowers.

Jackman Clematis—Large, velvet, purple blooms in June and July.

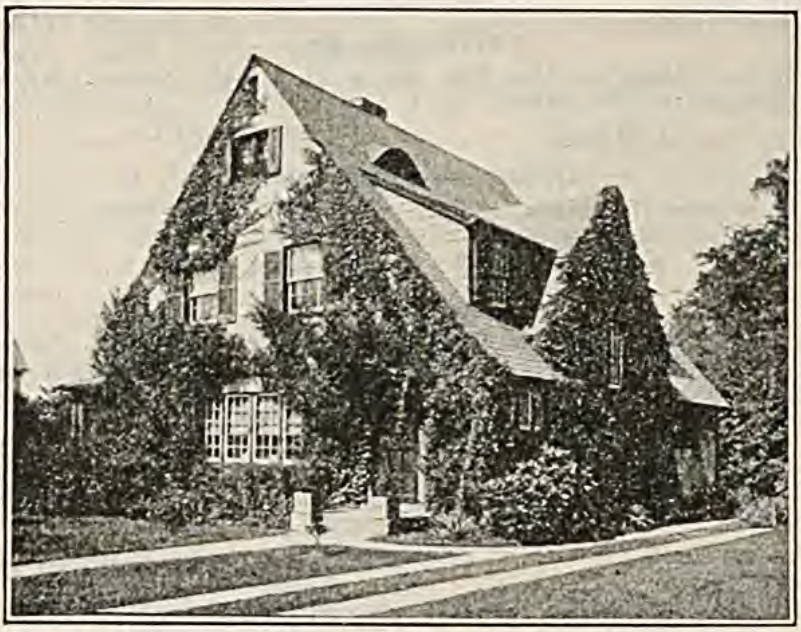
Mme. Edouard Andre Clematis—Large flowers of unusual red color.

Strong 2-year plants..... $1.00 each $9.00 per 10

Sweet Autumn Clematis (Clematis paniculata)

A splendid climber for covering porches and trellises. Flowers snowy white; produces in immense quantities during late summer and autumn.

Strong 2-year plants..... $.50 each $4.50 per 10



Climbing Vines Add the Finishing Touches to the Home

Chinese Wisteria

A rampant, growing, clinging vine. Flowers in large drooping clusters during May and June. We offer three colors—white, blue or lavender-purple.

Strong 2-year plants..... $.60 each $5.50 per 10

Dutchman's Pipe (Aristolochia sipho)

Large heart-shaped leaves and quaint pipe-shaped green flowers.

Strong 2-year plants..... $.75 each

English Ivy (Hedera helix)

The most popular evergreen vine; large, deep-green glossy foliage. Excellent for covering walls. Useful for shady locations.

Strong 2-year plants..... $.50 each $4.50 per 10

Hall's Japanese Honeysuckle

Dark, glossy, green foliage; fragrant flowers from July to fall.

Strong 2-year plants..... $.40 each $3.50 per 10

Japanese Spurge (Pachysandra terminalis)

Valuable evergreen ground cover. Will endure complete shade; very useful for planting under trees and other places where grass will not grow.

Strong plants..... $.25 each $2.00 per 10

Winter Jasmine (Jasminum nudiflorum)

Yellow blooms in early spring; makes a very showy plant for planting on slopes or against fences.

Strong 3-year plants..... $.50 each $4.50 per 10

Winter Creeper (Euonymus radicans)

Very desirable evergreen vine for covering banks and walls.

Strong 2-year plants..... $.50 each $4.50 per 10

HARDY PERENNIALS

Bleeding Heart (Dicentra spectablis)

In the springtime it produces a mass of rose-colored flowers in drooping spikes. $.50 each

Chrysanthemum

Begins to bloom as the first signs of winter come. We offer three separate colors—white, pink and yellow.

$.25 each $2.25 per 10

Delphinum or Larkspur

Bears mammoth spikes of sky blue flowers; a most attractive plant for the flower garden.

$.25 each $2.25 per 10

Hollyhocks

This perennial is a universal favorite everywhere; flowering spikes filled with massive flowers. We offer the following double flowered types—pink, white, yellow and red.

$.25 each $2.25 per 10

Iris

A mass of bloom in May and June. We offer the following varieties:

Azure—Blue.
Helge—Yellow, with pearl shadings.
Mrs. Alan Gray—Lavender-pink.
Nivelungen—Violet-purple.
Patrocle—Dark reddish-violet.

$.25 each $2.25 per 10

Phlox

Unsurpassed for its vivid colored flowers; blooms in July and August. We offer three colors—pink, blue and white.

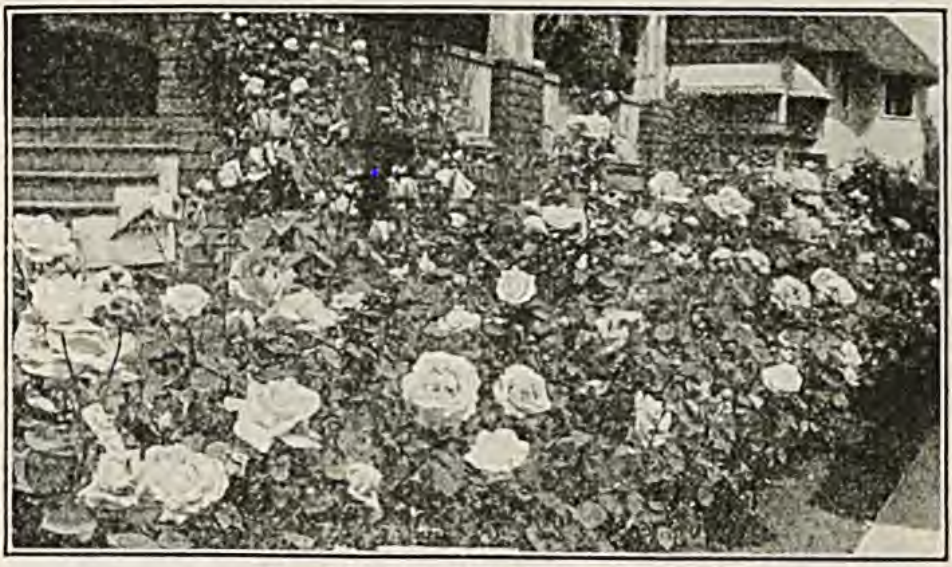
$.20 each $1.75 per 10

Red Hot Poker or Tritoma

Blooms freely from August to October; glowing orange-colored spikes three to four feet high.

$.25 each $2.25 per 10

HARDY FIELD-GROWN ROSES



Ever-Blooming Hybrid Tea Roses

EVER-BLOOMING—HYBRID TEAS

Duchess of Wellington—Long, tapering bud; very large, fragrant, saffron-yellow flower.

Etoile de France—Vivid crimson, with darker shadings.

Kaiserin Auguste Viktoria—Soft, pearly white color, shading to cream. Most popular white rose.

Los Angeles—Luminous, flame-pink color; washed with gold at the base; fragrant.

Mme. Butterfly—A harmony of bright pink, apricot and gold.

Mme. Edouard Herriot—Long-pointed, deep, coral red buds, changing to a pleasing orange-pink color.

Mrs. Aaron Ward—Pointed buds of a rich yellow color, changing to a creamy yellow color after opening.

Radiance—Large, fragrant, long-stemmed, brilliant rose-pink flowers; most popular pink rose in America.

Red Radiance—Identical with Radiance, except flowers are of a deep red color.

Souv. de Claudius Pernet—Long-pointed buds; large, full flowers of a most striking sun-flower yellow.

PRICES ON ALL VARIETIES OF FIELD GROWN, TWO-YEAR BUDDED, FIRST CLASS EVER-BLOOMING HYBRID TEA ROSES

PRICES ON ALL VARIETIES OF FIELD-GROWN, TWO-YEAR BUDDED OR OWN ROOT, FIRST CLASS CLIMBING AND RAMBLER ROSES

$.65 each $5.50 per 10 $45.00 per 100

OUR LIBERAL GUARANTEE

Our nursery stock is guaranteed to reach the customer in good condition. Accept shipment on arrival, examine and count stock and notify us at once should there be any error and same will be promptly corrected. Also notify the transportation company should stock appear to have been damaged in transit. We do not guarantee continued growth. A tree, shrub or plant is a living organism—it breathes, drinks and feeds and is liable to attacks of disease and insects after being transplanted to the customer's grounds. Our selling prices are very low and we cannot guarantee growth or be responsible for the nursery stock after delivery to our customers in good condition.—HARRISONS' NURSERIES, Inc.

NON-WARRANTY—In the event that any nursery stock sold by us should prove untrue to name under which it is sold, we hereby agree, on proper proof of such untrueness to name, to replace the original order or to refund the purchase price. Except for such liability, and in respect to all nursery stock sold by us, we give no warranty, expressed or implied, as to description, quality, productiveness or any other matter.—HARRISONS' NURSERIES, Inc.
